## Table 1. Profile of the State Population by Diagnosis

## Note: Table Re-numbered Table 11 for 2012 MHBG Reporting

This table summarizes the estimates of adults residing within the State with serious mental illness (SMI) and children residing within the state with serious emotional disturbances (SED). The table calls for estimates for two time periods, one for the report year and one for three years into the future. CMHS will provide this data to States based on the standardized methodology developed and published in the Federal Register and the State level estimates for both adults with SMI and children with SED.

		Current Report Year	Three Years Forward
Adults with Serio	us Mental Illness (SMI)		
Children with Ser	rious Emotional Disturbances (SED)		

Note: DO NOT COMPLETE THIS TABLE (table will be completed for the States by CMHS)

## URS Table 2A. Profile of Persons Served, All Programs by Age, Gender and Race/Ethnicity

## Note: Table Re-numbered Table 13A for 2012 MHBG Reporting

(for Race/Ethnicity): Comments on Data

(Overall):

This table provides an aggregate profile of persons in the reporting year. The reporting year should be the latest state fiscal year for which data are available. This profile is based on a client receiving services in programs provided or funded by the state mental health agency. The client profile takes into account all institutional and community services for all such programs. Please provide unduplicated counts if possible.

Note: Clients can be duplicated between Rows: e.g., The same client may be served in both state psychiatric hospitals and community mental health centers during the same year and thus would be reported in counts for both rows.

### **Instructions:**

Comments on Data

(Overall):

- 1 States that have county psychiatric hospitals that serve as surrogate state hospitals should report persons served in such settings as receiving services in state hospitals.
- 2 If forensic hospitals are part of the state mental health agency system include them.
- 3 Persons who receive non-inpatient care in state psychiatric hospitals should be included in the Community MH Program Row
- 4 Persons who receive inpatient psychiatric care through a private provider or medical provider licensed and/or contracted through the SMHA should be counted in the "Other Psychiatric Inpatient" row. Persons who receive Medicaid funded inpatient services through a provider that is not licensed or contracted by the SMHA should not be counted here.
- A person who is served in both community settings and inpatient settings should be included in both rows

  KTC: CNITIS has a standardized definition of KTC for Children: An organization, not necessed as a psychiatric nospital, whose primary purpose is the provision of multivariant programs of mental health treatment services in conjunction with residential care for children and youth primarily 17 years old and younger. It has a clinical program that is directed by a
  psychiatrist, psychologist, social worker, or psychiatric nurse who has a master's degree or doctorate. The primary reason for the admission of the clients is mental illness that can be classified
- by DSM-IV codes-other than the codes for mental retardation, developmental disorders, and substance-related disorders such as drug abuse and alcoholism (unless these are co-occurring with a mental illness)." If your state serves adults in residential treatment centers, these adults should be reported in the residential treatment center row using the appropriate age group

## Table 4. Profile of Adult Clients by Employment Status

### Note: Table Re-numbered Table 18A for 2012 MHBG Reporting

This table describes the status of adults clients served in the report year by the public mental health system in terms of employment status. The focus is on employment for the working age population, recognizing, however, that there are clients who are disabled, retired or who are homemakers, care-givers, etc and not a part of the workforce. These persons should be reported in the "Not in Labor Force" category. This category has two subcategories: retired and other. (The totals of these two categories should equal the number in the row for "Not in Labor Force"). Unemployed refers to persons who are looking for work but have not found employment. Data should be reported for clients in non-institutional settings at time of discharge or last evaluation.

## Table 4a. Optional Profile of Adult Clients by Employment Status: by Primary Diagnosis Reported

## Note: Table Re-numbered Table 18B for 2012 MHBG Reporting

The workgroup exploring employment found that the primary diagnosis of consumers results in major differences in employment status. The workgroup has recommended that we explore the ability of states to report employment by primary diagnosis and the impact of diagnosis on employment. The workgroup recommended 5 diagnostic clusters for reporting.

Table 4a.	]

Comments on Data (for Diagnosis):	MSDMH can not currently breakon	ut employment status by diagnosis,	but we are working towards being able to rep	oort this table.	

## Table 5A. Profile of Clients by Type of Funding Support

Comments on Data

Note: Table Re-numbered Table 3A for 2012 MHBG Reporting

This table provides a summary of clients by Medicaid coverage. Since the focus of the reporting is on clients of the public mental health service delivery system, this table focuses on the clientele serviced by public programs that are funded or operated by the State Mental Health Authority. Persons are to be counted in the Medicaid row if they received a service reimbursable through Medicaid.

# PLEASE DO NOT ADD, DELETE OR MOVE ROWS, COLUMNS AND/OR CELLS!

Please note that the same person may be served in both Medicaid and Non-Medicaid programs during the same reporting period.

### **Recommended Scoring Rules**

Please use the same rules for reporting Social connectedness and Functioning Domain scores as for calculating other Consumer Survey Domain scores for Table 11: E.g.:

- 1. Recode ratings of "not applicable" as missing values.
- 2. Exclude respondents with more than 1/3rd of the items in that domain missing.
- 3. Calculate the mean of the items for each respondent.
- 4. FOR ADULTS: calculate the percent of scores less than 2.5. (percent agree and strongly agree).
- 5. FOR YSS-F: calculate the percent of scores greater than 3.5. (percent agree and strongly agree).

## **Items to Score in the Functioning Domain:**

#### **Adult MHSIP Functioning Domain:**

- 1 I do things that are more meaningful to me.
- 2 I am better able to take care of my needs.
- 3 I am better able to handle things when they go wrong.
- 4 I am better able to do things that I want to do.
- 5 My Symptoms are not bothering me as much (this question already is part of the MHSIP Adult Survey)

#### **YSS-F Functioning Domain Items:**

- 1 My child is better able to do things he or she wants to do.
- 2 My child is better at handling daily life. (existing YSS-F Survey item)
- 3 My child gets along better with family members. (existing YSS-F Survey item)
- 4 My child gets along better with friends and other people. (existing YSS-F Survey item)
- 5 My child is doing better in school and/or work. (existing YSS-F Survey item)
- 6 My child is better able to cope when things go wrong. (existing YSS-F Survey item)

### Items to Score in the Social Connectedness Domain:

#### **Adult MHSIP Social Connectedness Domain:**

- 1 I am happy with the friendships I have.
- 2 I have people with whom I can do enjoyable things.
- 3 I feel I belong in my community.
- $4\,$  In a crisis, I would have the support I need from family or friends.

#### **YSS-F Social Connectedness Domain Items:**

- 1 I know people who will listen and understand me when I need to talk
- 2 I have people that I am comfortable talking with about my child's problems.
- $\ensuremath{\mathtt{3}}$  In a crisis, I would have the support I need from family or friends.
- 4 I have people with whom I can do enjoyable things

## Table 10. Profile of Agencies Receiving Block Grant Funds Directly from the State MHA

Note: Table Re-numbered Table 8 for 2012 MHBG Reporting. Some additional details are requested (noted in red shading)

This table is to be used to provide an inventory of providers/agencies who directly receive Block Grant allocations.

Only report those programs that receive MHBG funds to provide services. Do not report planning council member reimbursements or other administrative

reimbursements related to running the MHBG Program.

Please use only one row for each program

# PLEASE DO NOT ADD, MERGE, DELETE OR MOVE COLUMNS AND/OR CELLS!

### **Table 12: State Mental Health Agency Profile**

Note: Table Re-numbered Table 11 for 2012 MHBG Reporting

The purpose of this profile is to obtain information that provides a context for the data provided in the tables. This profile covers the populations served, services for which the state mental health agency is responsible, data reporting capacities, especially related to duplication of numbers served as well as certain summary administrative information.

PLEASE DO NOT ADD, DELETE OR MOVE ROWS, COLUMNS AND/OR CELLS

## Table 14A. Profile of Persons with SMI/SED served by Age, Gender and Race/Ethnicity

Note: Table Re-numbered Table15B for 2012 MHBG Reporting

This is a developmental table similar to Table 2A. and 2B. This table requests counts for persons with SMI or SED using the definitions provided by the CMHS. Table 2A. and 2B. included all clients served by publicly operated or funded programs. This table counts only clients who meet the CMHS definition of SMI or SED. For many states, this table may be the same as Tables 2A. and 2B. For 2007, states should report using the Federal Definitions of SMI and SED if they can report them, if not, please report using your state's definitions of SMI and SED and provide information below describing your state's definition.

# PLEASE DO NOT ADD, DELETE OR MOVE ROWS, COLUMNS AND/OR CELLS!

### New Table 15A. Profile of Persons served in the community mental health setting, State Psychiatric Hospitals and Other Settings for Adults with SMI and Children with SED

Note: This table is a copy of URS Table 3, but clients are limited to Adults w/ SMI and Children w/ SED

This table provides a profile for Adults with Serious Mental Illnesses (SMI) and Children With Serious Emotional Disturbances (SED) that received public funded mental health services in community mental health settings, in state psychiatric hospitals, in other psychiatric inpatient programs, and in residential treatment centers for children.

## PLEASE DO NOT ADD, DELETE OR MOVE ROWS, COLUMNS AND/OR CELLS!

Note: Clients can be duplicated between Rows: e.g., The same client may be served in both state psychiatric hospitals and community mental health centers during the same year and thus would be reported in counts for both rows.

#### **Instructions:**

(Overall):

- 1 States that have county psychiatric hospitals that serve as surrogate state hospitals should report persons served in such settings as receiving services in state hospitals.
- 2 If forensic hospitals are part of the state mental health agency system include them.
- 3 Persons who receive non-inpatient care in state psychiatric hospitals should be included in the Community MH Program Row
- 4 Persons who receive inpatient psychiatric care through a private provider or medical provider licensed and/or contracted through the SMHA should be counted in the "Other Psychiatric Inpatient" row. Persons who receive Medicaid funded inpatient services through a provider that is not licensed or contracted by the SMHA should not be counted here.
- 5 A person who is served in both community settings and inpatient settings should be included in both rows
- RTC: CMHS has a standardized definition of RTC for Children: "An organization, not licensed as a psychiatric hospital, whose primary purpose is the provision of individually planned programs of mental health treatment services in conjunction with residential care for children and youth primarily 17 years old and younger. It has a clinical program that is directed by a
- psychiatrist, psychologist, social worker, or psychiatric nurse who has a master's degree or doctorate. The primary reason for the admission of the clients is mental illness that can be classified by DSM-IV codes-other than the codes for mental retardation, developmental disorders, and substance-related disorders such as drug abuse and alcoholism (unless these are co-occurring with a mental illness)."

## **Table 15. Living Situation Profile:**

### Note: Table Re-numbered Table 19 for 2012 MHBG Reporting

Number of Clients in Each Living Situation as Collected by the Most Recent Assessment in the Reporting Period All Mental Health Programs by Age, Gender, and Race/Ethnicity

Please provide unduplicated counts, if possible. This table provides an aggregate profile of persons served in the reporting year. The reporting year should be the latest state fiscal year for which data are available. This profile is based on a client's last known Living Situation.

# PLEASE DO NOT ADD, DELETE OR MOVE ROWS, COLUMNS AND/OR CELLS!

Please report the data under the Living Situation categories listed - "Total" are calculated automatically.
