FEATURED RELIAS TRAINING
May 2019

Evidence-Based Treatment for First Episode Psychosis
REL-HHS-0-EBTFEP

This course will focus on why and how to intervene in the early stages of psychosis. It shows the history and context for early detection and specialized treatment of psychotic disorders; the evidence that early intervention services are effective in improving a variety of clinical and functional outcomes; how to identify early warning signs of psychosis; key elements of specialized early treatment; and ways you can apply these strategies in your own practice.
Credit Hours 1

Family Psychoeducation: Introduction to Evidence-Based Practices
REL-HHS-0-FPIEBP-V2

This course presents an overview of family psychoeducation, an evidence-based intervention model that engages family members and other relevant community members as partners in the treatment process. It provides an overview of family psychoeducation as well as its core components, objectives, and benefits. It includes interactive exercises and detailed case studies to reinforce your learning so that you can establish a good foundation for incorporating family psychoeducation into your practice.
Credit Hours 1.25

WEBINAR: Exploring Best Practices in Integrated Care
REL-HHS-NCCBH-W006

This webinar discusses the importance of integrating behavioral health and primary care, how to enact organizational and system change, and how to support health behavior change. The course covers the prevalence of various illnesses; why integrated care is necessary; the commitment required to reach a level of integrated care; and how behavioral health has transformed since its inception. The webinar is appropriate for professionals in behavioral health or primary care settings.
Credit Hours 1
