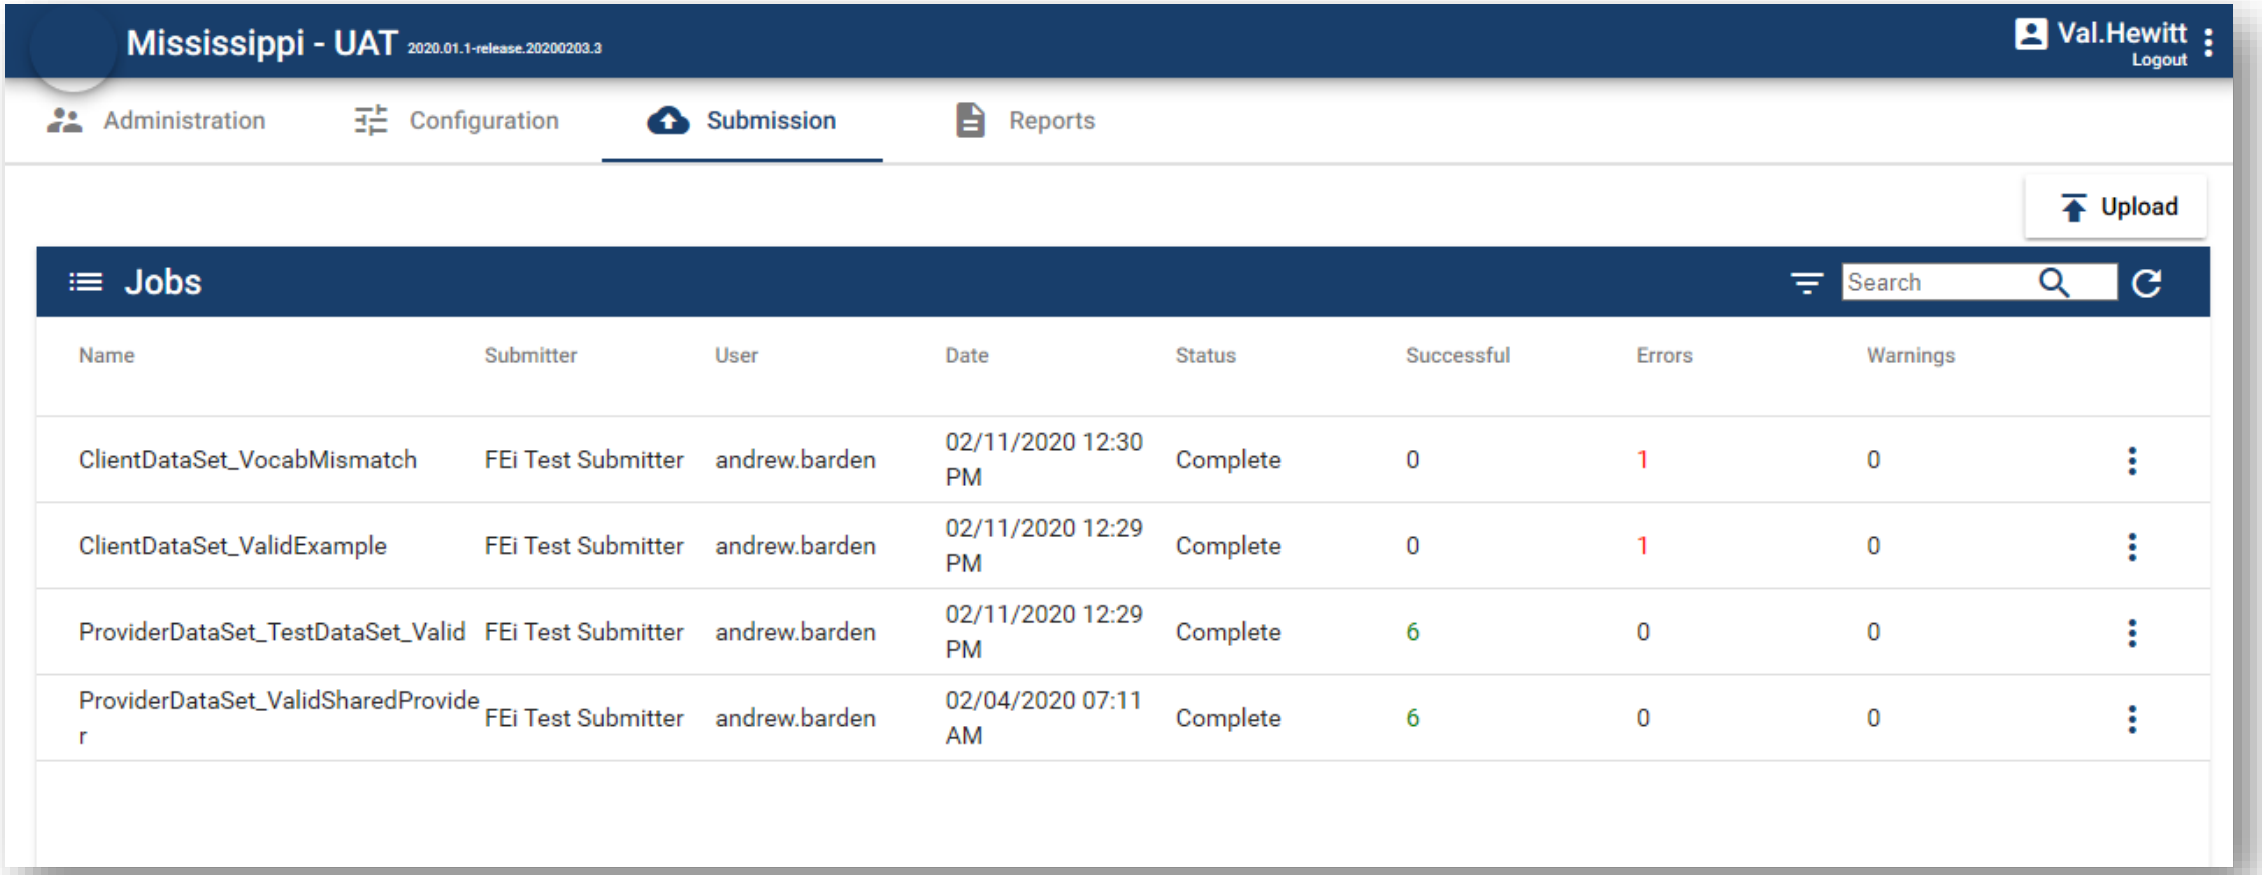
Agenda

- Submission Screen
- Data Set Dependencies
- Client Data Set
- Treatment Episode Data Set
- Service Event Data Set
- Troubleshooting

Submission Screen



Data Set Dependencies

Provider Data Set

- Must be processed and accepted by the system **before** any of the other data sets can be processed or accepted.

Client Data Set

- Dependent upon data within the Provider data set.

Treatment Episode Data Set

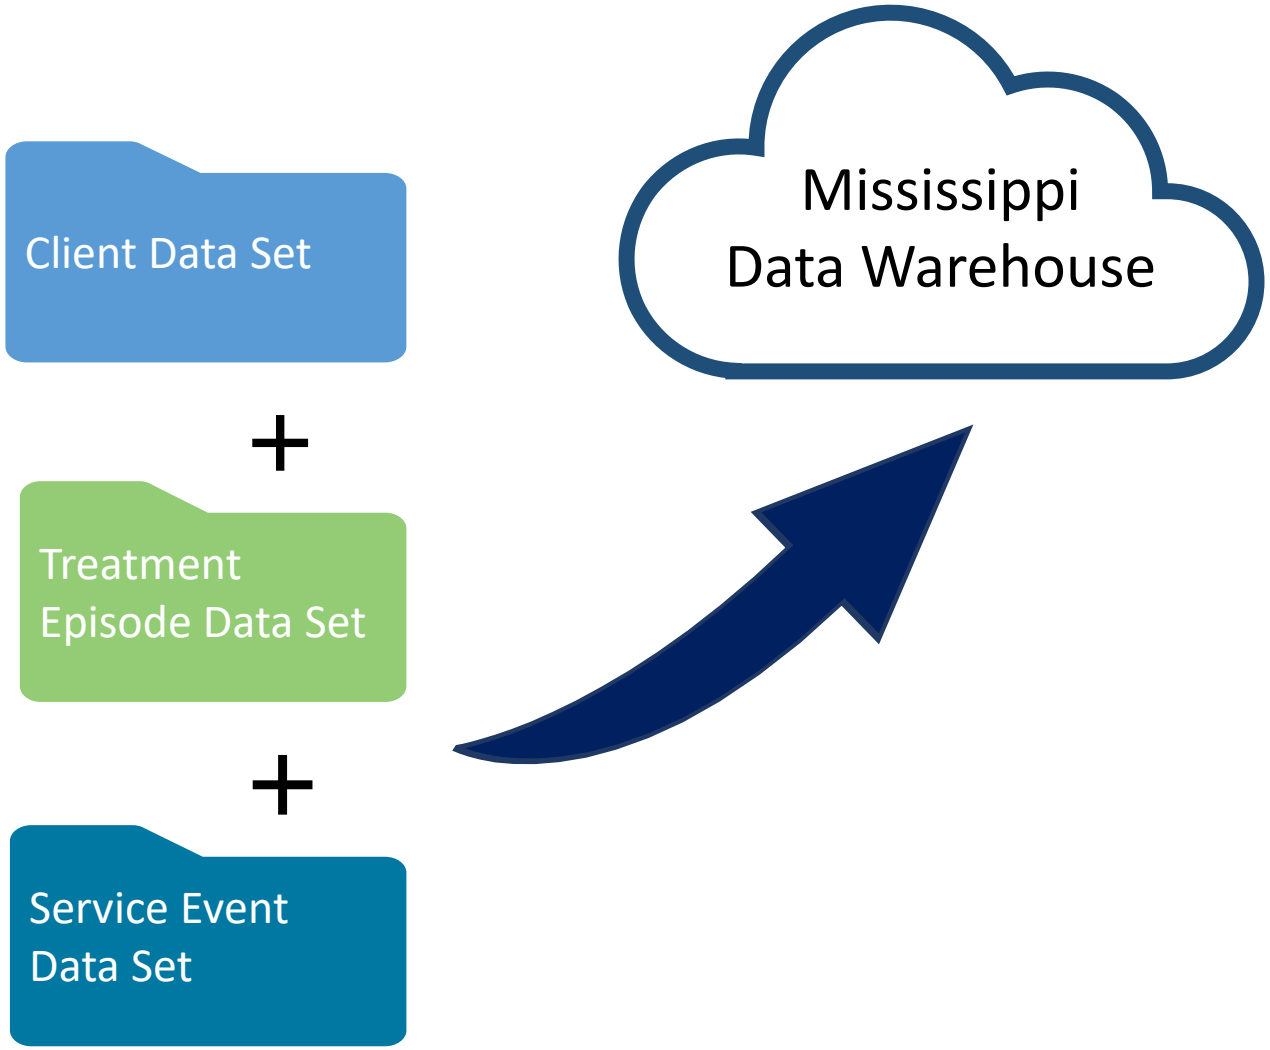
- Dependent upon data within the Client and Provider data sets.

Service Event Data Set

- Dependent upon data within the Treatment Episode and Provider data sets.

Multiple Data Sets

If a user submits files for multiple data set types at the same time, the system will automatically process the files in the correct order, which will avoid those types of errors.



Connecting Every Dimension of Health and Human Services

Things to Remember

- The name of the data set must be the first word in the file, followed by an underscore.
- The filename must be unique in the submitters set of currently uploaded and unprocessed files.
- The file must end with ".xml".
- File must be less than 50 megabytes.
- Validate files prior to submitting.

Provider Data Set

Provider Data Sets will be completed by the DMH.

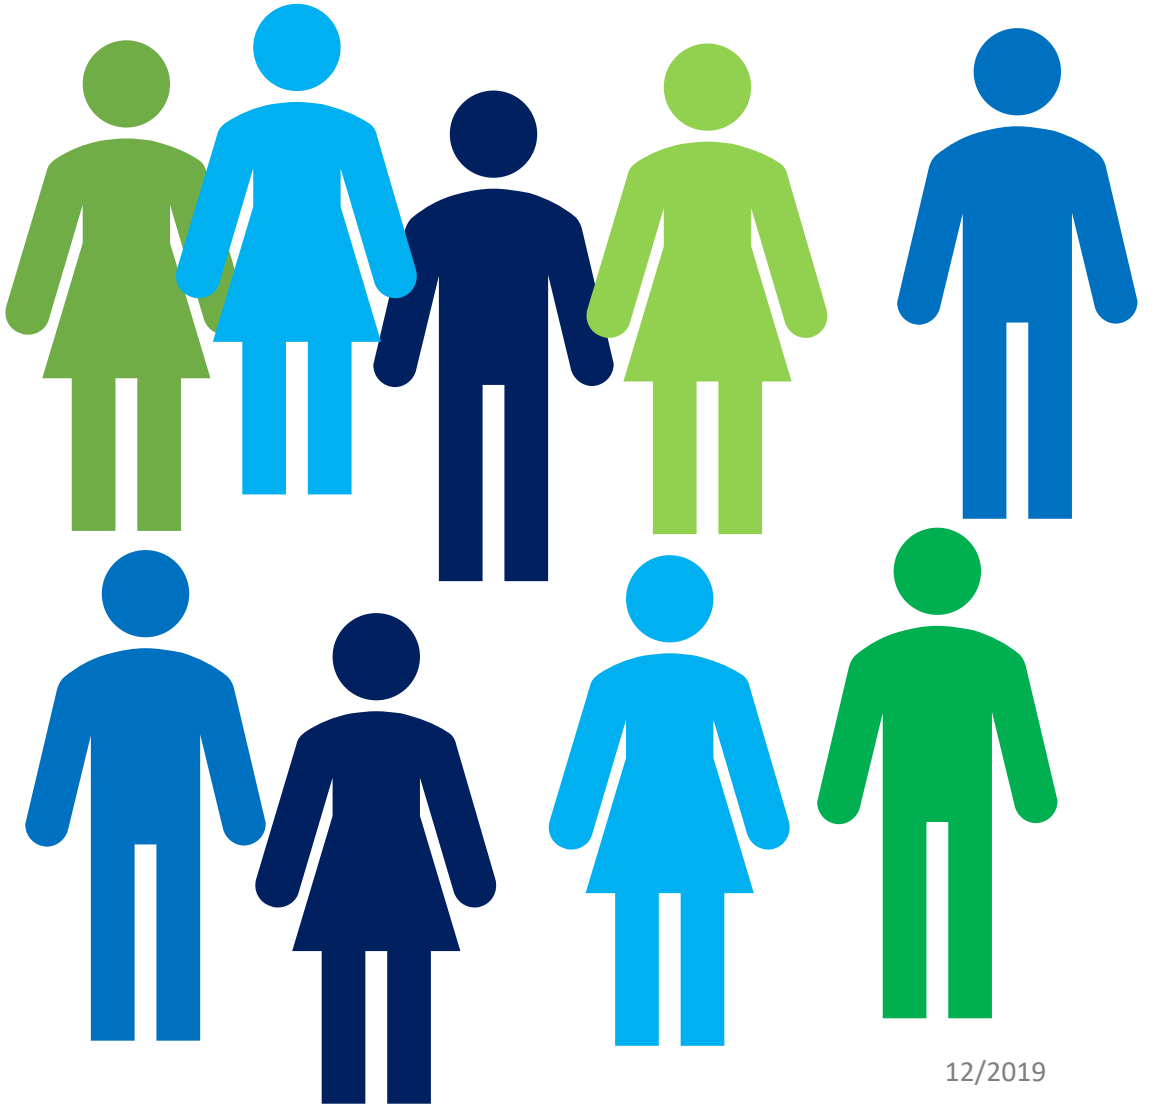
Client Data Set

Example of the file name:

ClientDataSet_20180215083045.xml

Client uploads must have an SSN and must have at least one address.

If a record is uploaded more than once, it will only update changed fields.

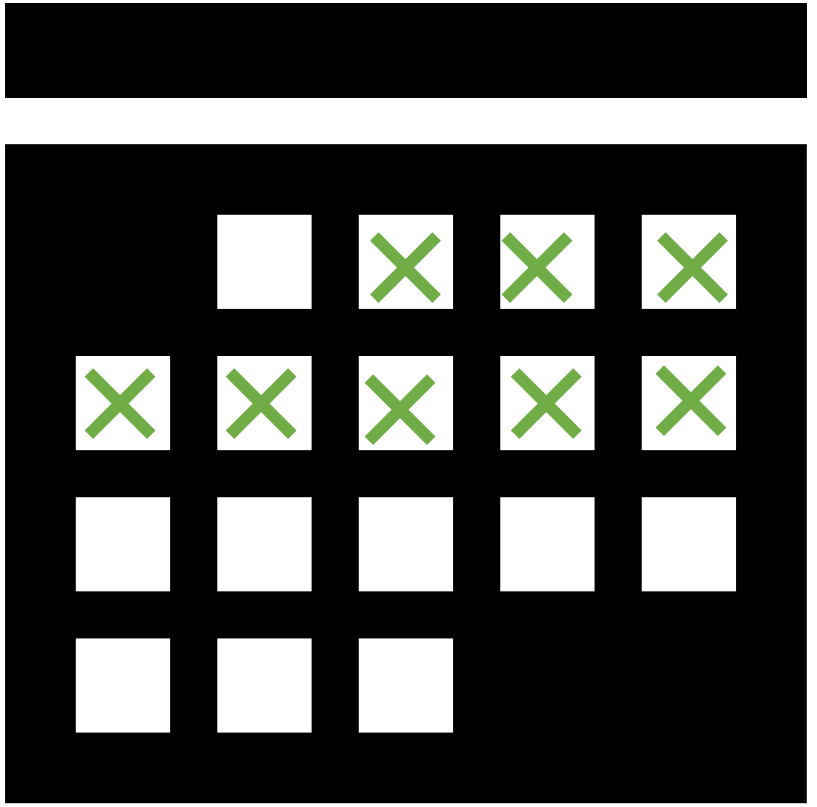


Connecting Every Dimension of Health and Human Services

Treatment Episode Data Set

Example of the file name:

TreatmentEpisodeDataSet_20180215083045.xml

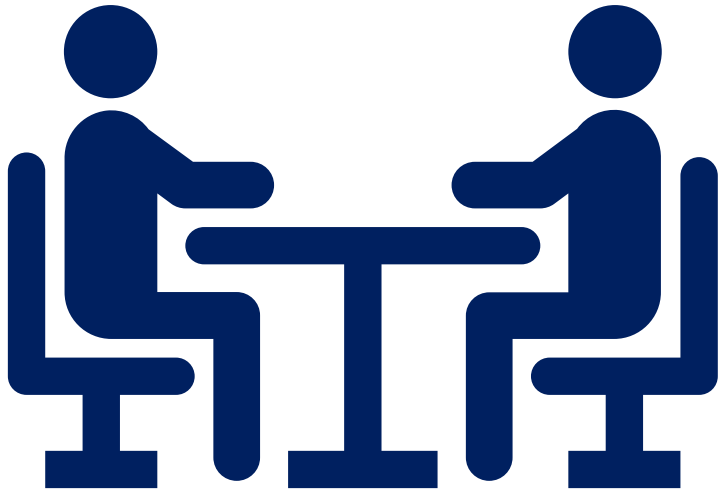


Connecting Every Dimension of Health and Human Services

Service Event Data Set

Example of the file name:

ServiceEventDataSet_20180215083045.xml



Upload Actions

- Initial
- Update
- Delete

Troubleshooting Errors

- Business Rule
- Warning
- Data link
- Invalid Vocabulary Code
- Schema validation
