Forward

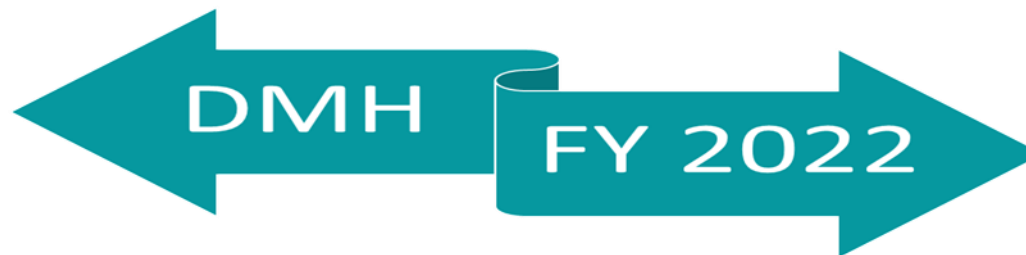

In September 2021, the Honorable Judge Carlton Reeves issued a Final Judgement and Remedial Order in the case of United States of America v. State of Mississippi (Cause No. 3:16-CV-622-CWR-FKB). In response to the Remedial Order, the Mississippi Department of Mental Health (DMH) hired a Chief Clinical Officer for the DMH Bureau of Behavioral Health Services and established a DMH Office of Utilization Review.

Beginning in Fiscal Year 2022, data validation and reconciliation efforts were initiated by the Chief Clinical Officer. These efforts included conducting meetings with each of the 13 regional Community Mental Health Centers (CMHCs) and specifically requiring the participation of the CMHC Executive Director (and/or a CMHC representative) as well as programmatic and data analytic staff.

At the onset of Fiscal Year 2022, CMHC Executive Directors were informed of this new review and monitoring process with the expressed purpose of confirming the accuracy and reliability of the submitted data monthly through a data validation and reconciliation process. This process also serves as a feedback mechanism to assist the CMHC community providers in improving their data tracking and reporting mechanisms and processes. Data validation and reconciliation processes focus on missing or incorrect values, duplicated records, corrupted values through provider Electronic Health Records (EHRs), as well as the clinical significance and meaningfulness of data reporting and successful data outcomes.

Data Validation and Reconciliation Call Summaries, summarizing the content of the meetings, the data discussed, noted discrepancies, and plans to address or reconcile errors or concerns, were introduced in January 2022. Both the Chief Clinical Officer as well as the CMHC Executive Director and/or identified representative are required to sign and date each call summary. For more specific information pertaining to data validation and reconciliation efforts initiated and occurring during Fiscal Year 2022, please refer to page three of this report.

The DMH Office of Utilization Review was begun on April 1, 2022. This office is responsible for reviewing the utilization of behavioral health services for state-operated programs and key community-based services to focus on the prevention of unnecessary hospitalization and on avoiding hospital readmissions. Similar data validation and reconciliation efforts pertaining to hospital discharge planning and pre-evaluation screenings conducted by CMHCs are planned to begin in Fiscal Year 2023 through the DMH Office of Utilization Review.

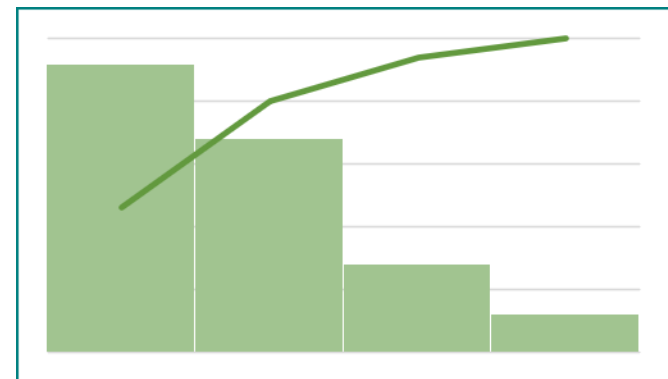

Data Validation and Reconciliation Process - CMHCs

Data Validation and Reconciliation efforts were documented for each Community Mental Health Center (CMHC) in respective data spreadsheet workbooks. Data Validation and Reconciliation efforts throughout Fiscal Year 2022 focused on comparisons and discrepancies between paper monthly grant outcome data submissions from the CMHCs and the data transferred from their respective Electronic Health Records (EHRs) to the Mississippi Department of Mental Health's Data Warehouse. These workbooks were updated prior to each Data Validation and Reconciliation call. Additionally, in November 2021, validation and reconciliation efforts were initiated within the DMH Division of Adult Services, for all Adult Community Mental Health Services, specifically related to paper monthly grant outcome reports submitted by the CMHCs.

The workbooks included review and monitoring of the following data points: Crisis Stabilization Unit Admissions, Crisis Residential Services (individuals served and units of service), Programs of Assertive Community Treatment (PACT) (individuals served and units of service), Intensive Community Outreach and Recovery Teams (ICORT) (individuals served and units of service), Intensive Community Support Services (ICSS) (individuals served and units of service), Community Support Services (individuals served and units of service), Supported Employment Services (individuals served and units of service), Peer Support Services (individuals served and units of service), and Community Living (individuals served and units of service).

Although documented, units of service have not been a primary focus of review during Fiscal Year 2022. Units of service vary greatly depending on the nature of each CMHC's reporting methods in the provider's EHR (varying from billable units to unit equivalents of minutes or hours of service). Rather, the development of consistent and reliable data related to unduplicated individuals served has been the primary focus during Fiscal Year 2022 data validation meetings.

As the fiscal year progressed, significant progress was seen in comparing and reconciling discrepancies between paper monthly grant outcome data submissions and the DMH Data Warehouse data. Consequently, a transition occurred in January 2022; paper monthly grant outcome data submissions were no longer reviewed in the validation and reconciliation process. Beginning in January 2022, each CMHC was asked to email EHR specific data on all reviewed data points. The submitted EHR data was then compared to the Data Warehouse for errors and discrepancies. Inclusion of the Web Infrastructure for Treatment Services (WITS) Crisis Module Data in the Data Validation and Reconciliation reviews began in April 2022.

Remedial Order Items - Paragraphs 19 - 21

- ▶ Technical Assistance to providers including competency-based training, consultation, and coaching; provided by persons who have demonstrated substantial experience in implementing the Core Services
- ▶ Admissions to Residential Crisis Services locations, by location broken down by CMHC region and by county, and admissions to State Hospitals from Residential Crisis Services and where Residential Crisis Services were not provided
- ▶ Calls to Mobile Crisis Teams, with the number of calls leading to a mobile team visit, the average time from call to visit, the number of calls where the time to visit exceeded limits in the applicable *DMH Operational Standards* rule, and the disposition of call and/or Mobile Team Visit
- ▶ Civil Commitments to State Hospitals by CMHC region and by county
- ▶ Jail placements pending State Hospital admission by CMHC region and county, including length of placement
- ▶ Individuals who remain hospitalized in State Hospitals for over 180 days
- ▶ Persons receiving each Core Service by CMHC region and by county
- ▶ Number of units of each Core Service reimbursed through Medicaid by CMHC region and by county
- ▶ Number of units capturing covered Core Services reimbursed under DMH grants, excluding Purchase of Service grants
 - Remedial Order Paragraph 21 states that by the end of Fiscal Year 2022, Mississippi will begin collecting, reviewing, and analyzing, monthly, person-level and aggregate data capturing the number of units of each covered Core Service reimbursed under DMH grants, excluding Purchase of Service grants.
 - In June 2022, the Mississippi Department of Mental Health began discussions to develop the methodology for collecting, reviewing, and analyzing data pertaining to the number of units of each covered Core Service. However, beginning in Fiscal Year 2023, at the request of the regional Community Mental Health Centers, DMH returned to a cost reimbursement mechanism and no longer utilized “Fee-for-Service” reimbursement for the covered Core Services. This change in DMH’s reimbursement structure no longer allows for capturing the number of units of each covered Core Service.

Technical Assistance – Remedial Order 19

- Mississippi will provide Technical Assistance (TA) to providers including competency-based training, consultation, and coaching. The technical assistance will be provided by persons who have demonstrated substantial experience in implementing the Core Services. The table below illustrates the technical assistance provided by the Mississippi Department of Mental Health in the Adult Mental Health Core Service areas for Fiscal Year 2022.

Fiscal Year 2022 Adult Mental Health Core Services/Core Services-related Technical Assistance

Crisis Stabilization Unit (CSU) Admissions
By County of Residence
July 1, 2021 - June 30, 2022

Admissions to Residential Crisis Services – Report Narrative

During Fiscal Year 2022, Crisis Stabilization Unit admissions were captured through two different data reporting mechanisms. The first data reporting mechanism involved each Crisis Stabilization Unit, run by the respective Regional Community Mental Health Center (CMHC), submitting a monthly grant outcome form to the DMH Division of Adult Services. This monthly grant outcome form included, but was not limited to, the following data fields: “Total Number of Admissions” and “County of Referral.” This information was then entered into a database for tracking and monitoring. It should be noted that the Total Number of Admissions is not unduplicated. Therefore, this number captures total admissions, including an individual who may have been served multiple times, at multiple CSUs, throughout the state during the designated reporting period. The second data reporting mechanism includes data transfers, both crisis residential service provision and Crisis Stabilization Unit admissions, differentiated by Regional Community Mental Health Centers, County of Residence, and County of Service Location, from each respective CMHC’s Electronic Health Record (EHR) to the Mississippi Department of Mental Health Data Repository referred to as the Data Warehouse. For this respective report, 3,108 admissions were reported by the Community Mental Health Centers for July 1, 2021 – June 30, 2022. These admissions and county breakdowns were carefully reviewed, and the following three counties accounted for the most referrals to CSUs during the respective reporting period: Harrison County accounted for 7.40%, DeSoto County accounted for 4.50%, and Hinds County accounted for 4.47% of referrals to CSUs. It should be noted that Region 11’s Crisis Stabilization Unit (CSU) in Natchez, MS, was not operational until October 2021. Furthermore, the Batesville CSU (which was previously under the operation of Region 4) was transitioned to Region 2 in July 2022.

20a. State Hospital Admissions/Crisis Residential Services

*September 1, 2021 - June 30, 2022		
FY 2022 State Hospital Admissions/Crisis Residential Services Report		
State Hospital	Number of Individuals admitted to State Hospitals from Crisis Residential Services	Number of individuals admitted to State Hospitals without having been first served in Crisis Residential Services
MSH	64	485
NMSH	48	313
EMSH	44	171
SMSH	39	267
Total	195	1,236
<i>*Data collection for this report did not begin until September 2021.</i>		

State Hospital Admissions/Crisis Residential Services - Report Narrative

Beginning in September 2021 and throughout the remainder of Fiscal Year 2022, monthly self-reports were submitted from the four state hospitals to DMH via partial data extraction from hospital Electronic Health Records (EHR) systems, supplemented with electronic and manual collection, review and reporting methods. Two data items were submitted from each hospital: 1) the number of individuals admitted to state hospitals from Crisis Residential Services and 2) the number of individuals admitted to state hospitals without having first been served in Crisis Residential Services.

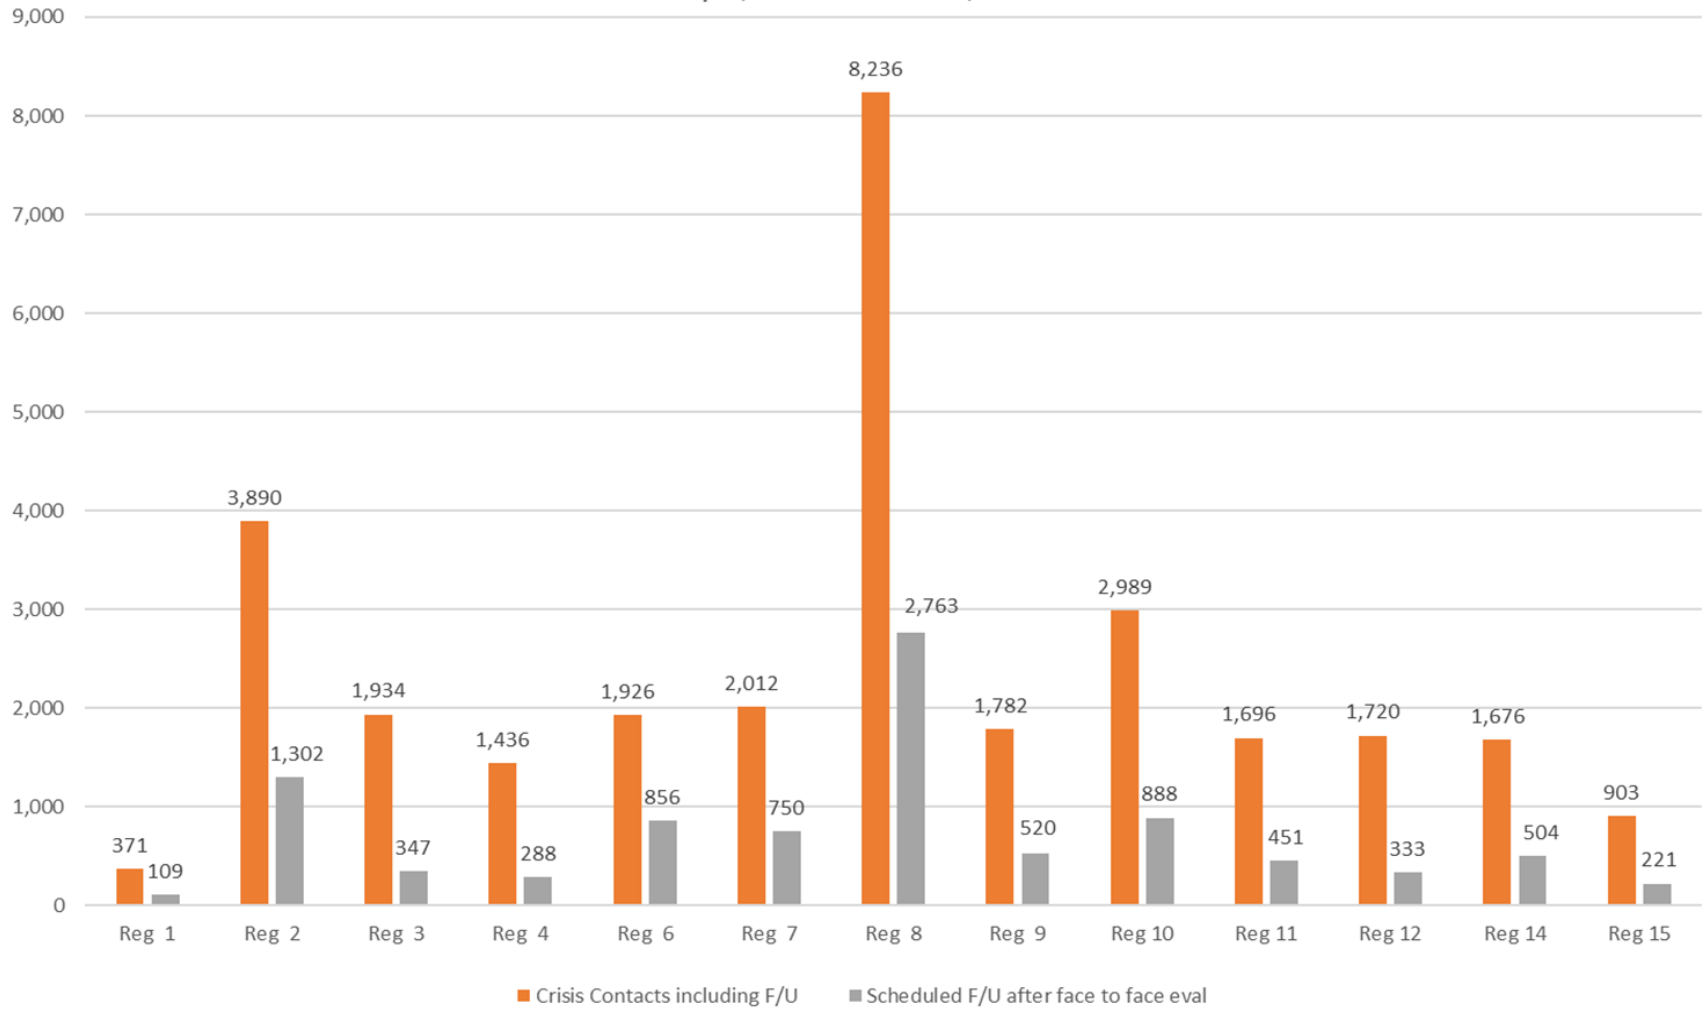

20b. Mobile Crisis Response Team Calls

July 1, 2021 - June 30, 2022		
Regional CMHC Mobile Crisis Team	Mobile Crisis Contacts (includes follow-ups)	Scheduled for a follow-up appointment with CMHC after face- to-face evaluation

14	1,676	504
15	903	221
TOTAL:	30,571	9,332

Mobile Crisis Response Teams - Report Narrative

During Fiscal Year 2022, the Mobile Crisis Response Teams reported two key pieces of data: 1) total number of mobile crisis contacts and 2) total number of individuals scheduled for a follow-up appointment with a CMHC after a face-to-face evaluation. It is important to note that the Mobile Crisis Contact data point includes both initial and follow-up contacts and is not an unduplicated count. Implementation of the Web Infrastructure for Treatment Services (WITS) Crisis Module for Mobile Crisis Response Team data reporting was piloted in April 2022 and officially began on July 1, 2022. The following data elements in Remedial Order Paragraph 20b will be tracked through WITS and reported in Fiscal Year 2023: data for average time from call to visit; number of calls where the time to visit exceeded limits, as outlined in the *DMH Operational Standards* document, and the disposition of the call and/or mobile team visit. The WITS Crisis Module requires the following data elements to be included for each Mobile Crisis Response Call entered: demographics (when available), contact method, date/time of call, presenting needs, steps taken after call (mobile crisis dispatch, de-escalation, follow-up appointment scheduled with a CMHC, etc.). If a Mobile Crisis Response Team responds face-to-face, then the following data elements are included: address, deployment date and time, evaluation date and time, evaluator, evaluation location, police department presence, evaluation outcome, indication of a warm hand-off, presence of a Crisis Intervention Team (CIT) officer, if an arrest was made, resolution date and time, resolution outcome, resolution facility, and indication of a follow-up appointment scheduled with the CMHC.

Mobile Crisis Contacts and Follow-ups
July 1, 2021 - June 30, 2022

Civil Commitments to State Hospitals by CMHC by Region and County - Report Narrative

During Fiscal Year 2022, monthly self-reports were submitted from the four state hospitals to DMH via partial data extraction from hospital Electronic Health Records (EHR) systems, supplemented with electronic and manual collection, review and reporting methods. This report is organized by CMHC region and by county. The county-level aspect of this report is based on the counties in which the corresponding commitment orders to the respective state hospitals were issued.

For Fiscal Year 2022, a total of 2,774 commitments to state hospitals were reported. Additionally, a total of 1,684 acute psychiatric admissions to state hospitals were reported for this same time frame. As these numbers indicate, not all commitments resulted in corresponding state hospital admissions (due to such factors as successful diversions from a state hospital level of care and persons being served by private, same level of care providers). Data validation and reconciliation efforts comparing the number of state hospital admissions to the number of commitments was begun in Fiscal Year 2022. DMH plans to enhance these efforts in Fiscal Year 2023.

Jail Placements pending State Hospital Admission by Region and County - Report Narrative

This report consists of data reflecting the numbers of individuals who were admitted to a state hospital who, prior to their hospital admissions, had been waiting in jail for an acute psychiatric commitment. The information in this report is estimated to be an unduplicated count of individuals. By county, CMHC region, and each individual state hospital, this report delineates the number of individuals reported to be in jail prior to hospital admission and the corresponding average number of days in jail. The report also provides the overall total number of individuals awaiting admission and the overall average wait time in jail among all four hospitals. For Fiscal Year 2022, coalescing the data submitted from all four hospitals, the overall average length of time spent in jail awaiting a state hospital admission was reported to be approximately 8.46 days. The data source for this report is as follows: monthly self-reports submitted from state hospitals to DMH via partial data extraction from hospital Electronic Health Records (EHR) systems, supplemented with electronic and manual collection, review and reporting methods.

20e. Individuals who remain hospitalized in State Hospitals for over 180 days

July 1, 2021 - June 30, 2022

State Psychiatric Hospital	Total # of Individuals Hospitalized for > 180 days
NMSH	3
SMSH	6
EMSH	46
MSH	66
Total among all four hospitals	121

Individuals who remain hospitalized in State Hospitals for over 180 days – Report Narrative

This report is comprised of monthly self-reports submitted from the four state hospitals to DMH via partial data extraction from hospital Electronic Health Records (EHR) systems, supplemented with electronic and manual collection, review and reporting methods. It includes an unduplicated count of the number of individuals at each state hospital with a hospital length of stay which exceeded 180 days during the covered time frame (Fiscal Year 2022). This report excludes the following patient populations: forensic (based on DMH's forensic definition), nursing home, substance use primary/Chemical Dependency Unit, and children/adolescents.

20f. Remedial Order Core Services by Region and County

Remedial Order Core Services

- Reported data points for Paragraph 20f were extracted from the Data Warehouse, the Department of Mental Health's data repository. The Data Warehouse system only accepts established "patients"/individuals with each respective CMHC and is based on accurate and reliable data transfer from each CMHC's respective EHR to the Data Warehouse. This method includes having the noted data fields correctly mapped to the correct service codes in the Data Warehouse and requires that the data submissions be entered correctly into the respective EHRs in a timely manner. Reports for the July 1, 2021 – June 30, 2022, service period were generated on August 19, 2022. These reports are an accurate representation of the data available to review in the Data Warehouse as of this date.
- Region 11 CMHC has minimal data available for review in the Data Warehouse. Due to transition of this CMHC's EHR and lack of interface with the Data Warehouse, Region 11 staff were responsible for manually entering their service data to WITS. WITS then transferred their manually entered data to the Data Warehouse. It is important to note that the limited Region 11 data in the Data Warehouse affects all service provision data and should be interpreted as an overall underestimation of service provision.
- It should be further noted that differences may occur in total number of individuals served between the County of Residence and the Regional CMHC data breakdown. The County of Residence reporting mechanism is attached to each unduplicated individual regardless of where the individual received services. The Data Warehouse analytics defined an "unduplicated individual" in such a manner that a single individual within a respective CMHC may be counted more than once, if the individual was served at multiple designated facilities within the respective agency (e.g., Region X main office, Region X satellite office). Additionally, individuals served by more than one CMHC, in a given service, may be represented in the Regional CMHC breakdown for all impacted agencies. Therefore, it is possible to have more individuals represented as being served in the Regional CMHC breakdown compared to the County of Residence breakdown. Reporting mechanisms will be tightened and narrowed in Fiscal Year 2023.
- "Unduplicated Individuals Served" signifies that an individual received a given service (e.g., PACT, ICORT, etc.). Unduplicated means that the individual is not counted more than once and is recognized as a distinct data point. An individual may be on an intensive service caseload. However, if the individual did not receive a service while on that caseload, then the person's service data would not be included in the Data Warehouse metrics. Data Warehouse metrics represent only individuals who have received a service.
- The "Regional CMHC(s) who provided service" column discriminates which CMHCs provided a given service for individuals who reside in each respective county. For instance, in the *Crisis Residential Services* table below, 62 unduplicated individuals who resided in Coahoma County received Crisis Residential Services (i.e., services at a CSU) from Regions 1, 4, 6, and 9. Although Coahoma County is in the Region 1 catchment area, individuals received care at CSUs outside of Region 1.

- Crisis Residential Services**

Crisis Stabilization Unit (CSU) Admissions and Crisis Residential Services – Report Narrative

Region 11's Crisis Stabilization Unit (CSU) in Natchez, MS, was not operational until October 2021. Furthermore, the Batesville CSU, previously under the operation of Region 4, was transitioned to Region 2 in July 2022.

Region 11 has experienced ongoing difficulty related to its EHR implementation and its interface with the DMH Data Warehouse. Consequently, Region 11's Crisis Residential Services data have not been successfully transferred to the Data Warehouse and, therefore, are not included in the above table. Region 11 staff reported, per the monthly grant outcome report, that Region 11 had 74 admissions and served 74 unduplicated individuals from October 2021- June 2022.

Twenty-six (26) individuals received care at a CSU operated by Regions 3, 4, 7, 9, 10, and 12 whose records indicated that they resided outside the state of Mississippi. Sixty-one (61) individuals received care at a CSU operated by Regions 3, 10, and 12; however, their county of residence information was "missing" from their service enrollments; these individuals were therefore listed as having "Missing Data."

- Programs of Assertive Community Treatment (PACT)

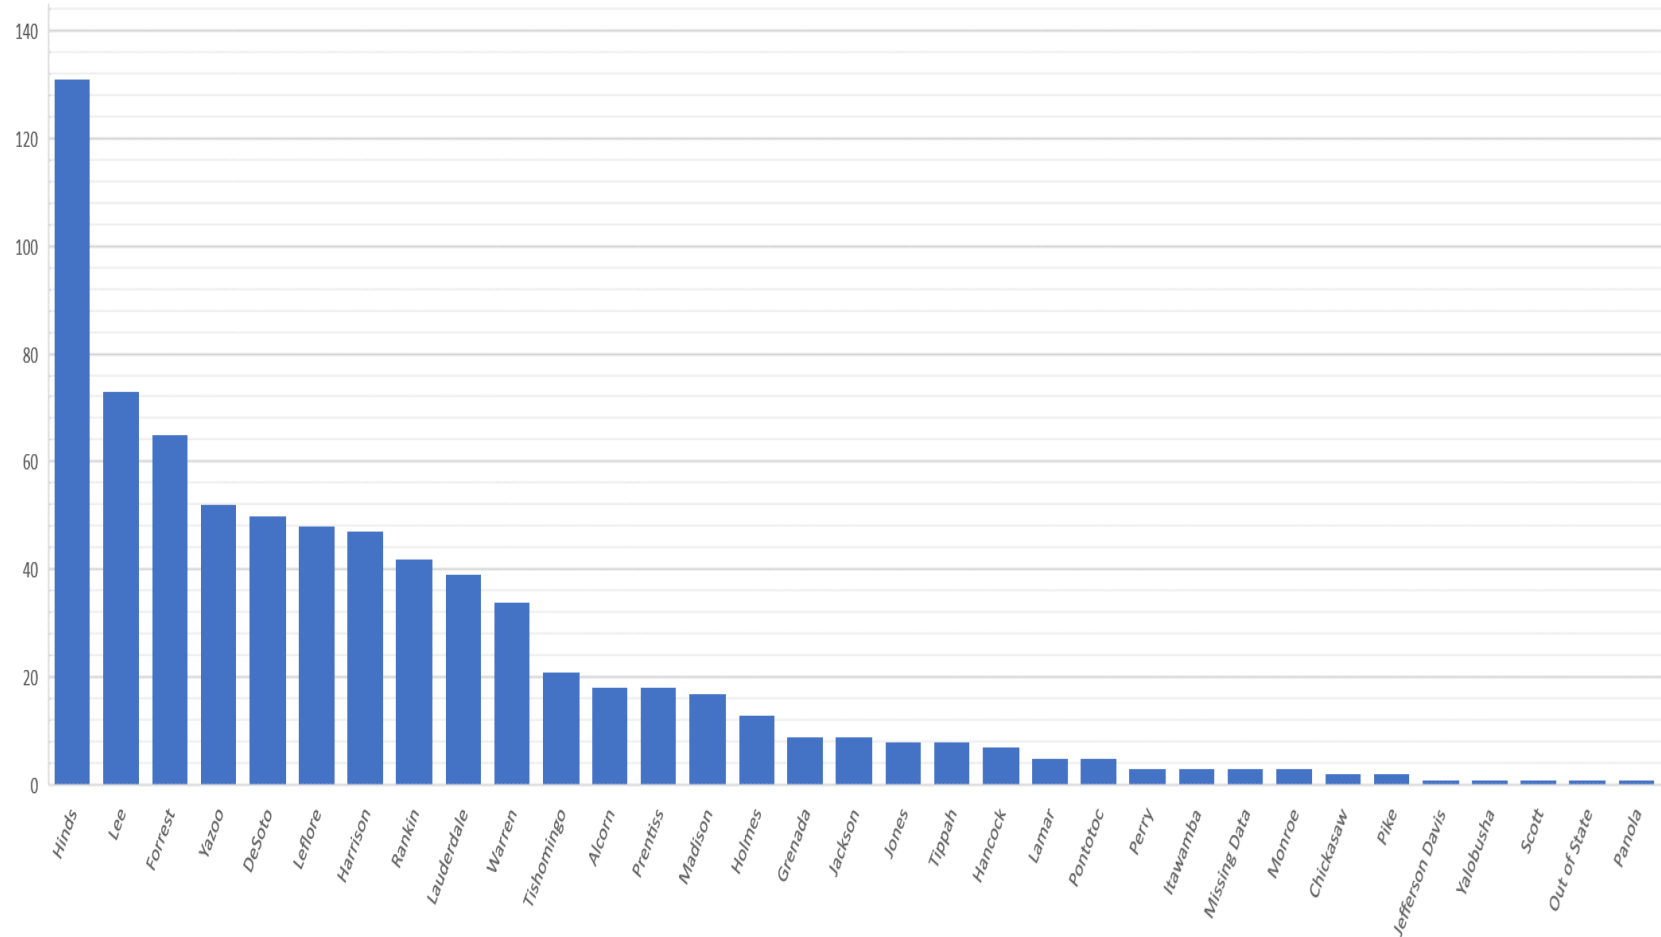

July 1, 2021 - June 30, 2022

Programs of Assertive Community Treatment (PACT)
Individuals Served by County of Residence
July 1, 2021 - June 30, 2022

Programs of Assertive Community Treatment (PACT) – Report Narrative

Mississippi has 10 PACT Teams located throughout the state. The table above denotes the counties which have a designated PACT team and how many individuals were served based on data available in the Data Warehouse. The Monthly Grant Outcome Table in this report reflects the number of individuals served based on monthly paper documentation from the CMHCs. Per the Monthly Grant Service Outcomes submitted via paper, 760 individuals were served through PACT. The discrepancy between the Data Warehouse reported data and the Monthly Grant Service Outcome data is likely attributed to differentiation between “enrolled” and “served,” and successful mapping of service provision from the respective EHR to the Data Warehouse.

Intensive Community Outreach and Recovery Teams (ICORT):
 Individuals Served by County of Residence
 July 1, 2021 - June 30, 2022

Intensive Community Outreach and Recovery Teams (ICORT) – Report Narrative

Mississippi has 16 ICORT Teams located throughout the state. However, during the Fiscal Year 2022 reporting period, Region 8 did not have an operational ICORT Team due to staffing limitations. The Monthly Grant Outcome Table located in this report reflects the number of individuals served based on monthly paper documentation from the CMHCs. Per the Monthly Grant Service Outcomes submitted via paper, 611 individuals were served through ICORT. The discrepancy between the Data Warehouse reported data and the Monthly Grant Service Outcome data is likely attributed to differentiation between “enrolled” and “served,” and successful mapping of service provision from the respective EHR to the Data Warehouse.

Intensive Community Support Services (ICSS) – Report Narrative

There are 35 funded Intensive Community Support Specialists throughout the state of Mississippi.

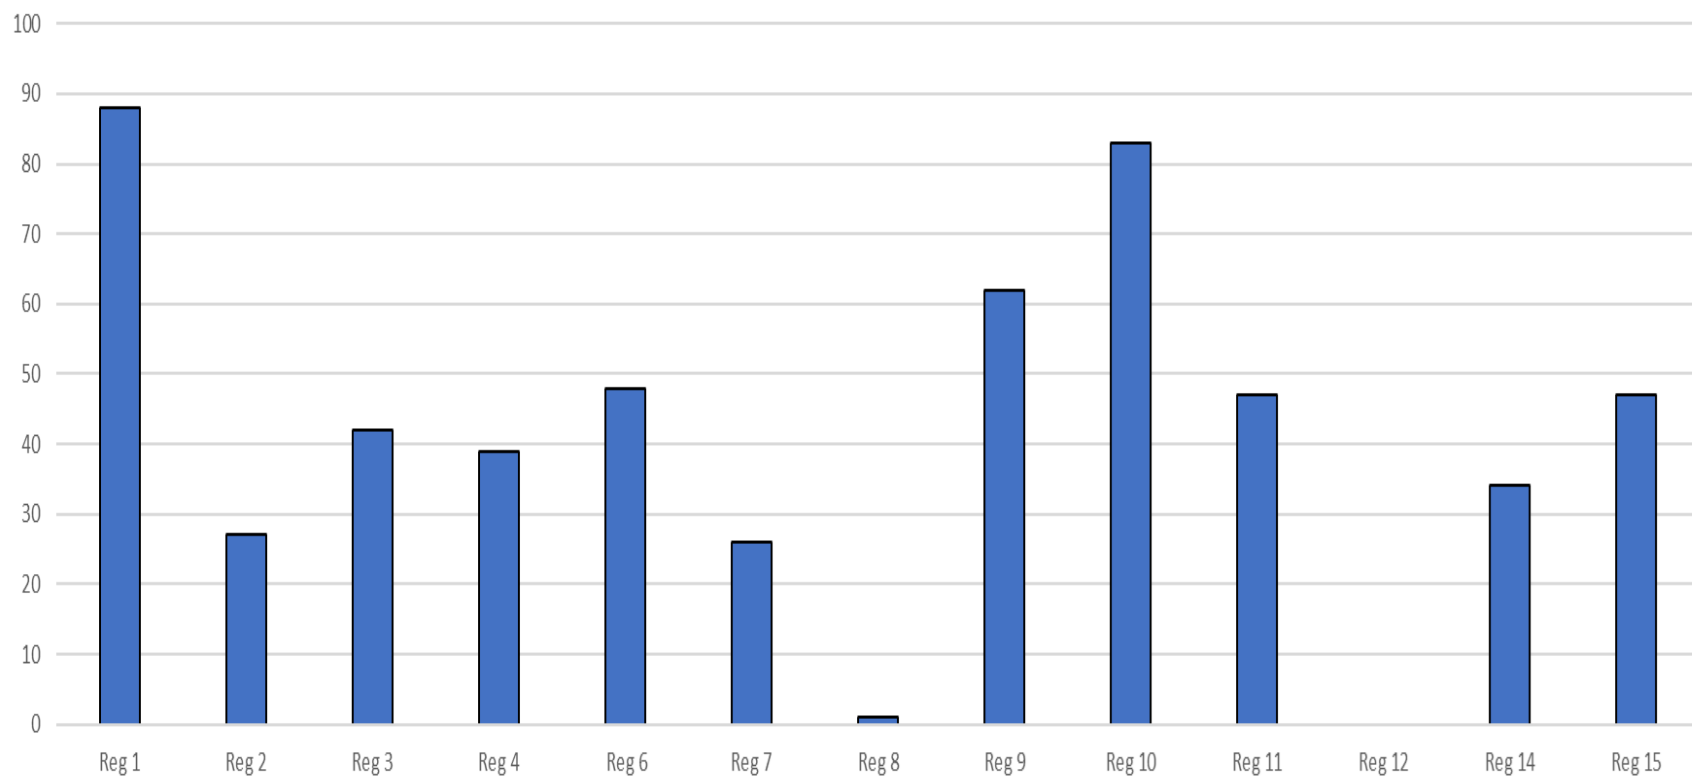

Difficulty with ICSS mapping and data development has occurred with some CMHC EHR systems, most significantly, Regions 8 and 12. The ICSS data for these regions are currently subsumed within CSS data which is reported to the Data Warehouse. Noted difficulties, as well as requests to correctly map, were documented beginning in August 2021. It is important to note this data mapping inconsistency when considering the landscape of ICSS service provision in Mississippi.

The Monthly Grant Outcome Table located in this report reflects the number of individuals served based on monthly paper documentation from the CMHCs. Per the Monthly Grant Service Outcomes submitted via paper, 1,054 individuals were served through ICSS. The discrepancy between the Data Warehouse reported data and the Monthly Grant Service Outcome data is likely attributed to differentiation between “enrolled” and “served,” and successful mapping of service provision from the respective EHR to the Data Warehouse. Most significantly, the ICSS data for individuals served by Regions 8 and 12 are absent from the Data Warehouse, which would account for approximately an additional 262 individuals.

Community Support Services (CSS) – Report Narrative

As noted previously, difficulty with ICSS mapping and data development has occurred with some CMHC EHR systems, most significantly, Regions 8 and 12. The ICSS data for these regions are currently subsumed within CSS data which is reported to the Data Warehouse. It is important to note this data mapping inconsistency when considering the landscape of ICSS and CSS service provision in Mississippi. The Monthly Grant Outcome Table located in this report reflects the number of CSS encounters by CMHC Region. Per the Monthly Grant Service Outcomes submitted via paper, 66,848 encounters were reported. Significant discrepancies in manner of reporting were found in CSS data. Some providers reported number of encounters, while others interpreted the request to include referrals. Such variability along a data reporting continuum affects the interpretation and explanations which can be culled during review and monitoring. The reported Data Warehouse data reflects individuals served, with the caveat that both the Region 8 and Region 12 ICSS data is subsumed within the reported CSS data in the Data Warehouse.

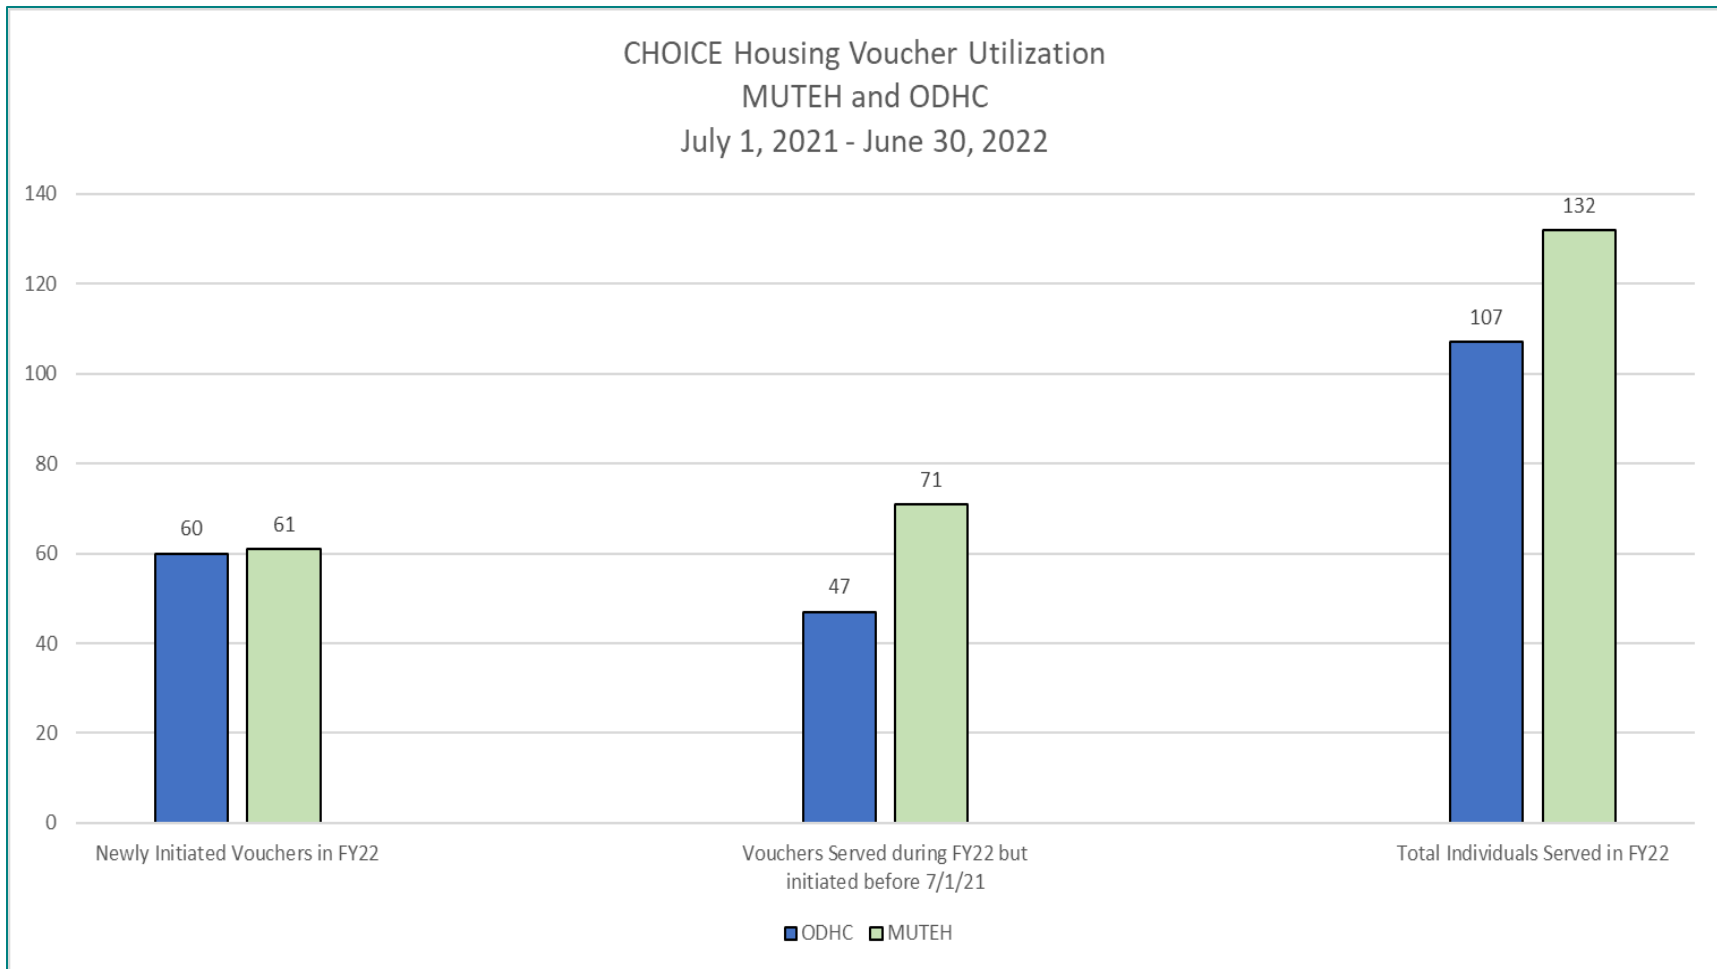

It should be further noted that differences may occur in total number of individuals served between the County of Residence and the Regional CMHC data breakdown. The County of Residence reporting mechanism is attached to each unduplicated individual regardless of where the individual received services. The Data Warehouse analytics defined an “unduplicated individual” in such a manner that a single individual within a respective CMHC may be counted more than once, if the individual was served at multiple designated facilities within the respective agency (e.g., Region X main office, Region X satellite office). Additionally, individuals served by more than one CMHC, in a given service, may be represented in the Regional CMHC breakdown for all impacted agencies. Therefore, it is possible to have more individuals represented as being served in the Regional CMHC breakdown compared to the County of Residence breakdown. Reporting mechanisms will be tightened and narrowed in Fiscal Year 2023. With respect to CSS, this distinction means that 16,321 unduplicated individuals were reported to receive CSS by the County of Residence report and 16,477 per the Regional report. Therefore, 156 individuals were served at multiple designated facilities within the respective agencies.

Permanent Supported Housing (CHOICE) – Report Narrative

Data reports were retrieved directly from Mississippi United to End Homelessness (MUTEH) and Open Doors Homeless Coalition (ODHC). A total of 121 CHOICE Vouchers were initiated during July 1, 2021 - June 30, 2022. MUTEH and ODHC reported that an additional 71 individuals and 47 individuals, respectively, were already housed utilizing a CHOICE voucher on July 1, 2021.

The number of individuals served through CHOICE for Fiscal Year 2022 was calculated by summing the number of individuals on roll with CHOICE on July 1, 2021, and the number of individuals housed, which resulted in a total of 239 individuals served. Therefore, a total of 239 individuals utilized a CHOICE Housing Voucher during Fiscal Year 2022.

Supported Employment
Individuals Served by County of Residence
July 1, 2021 - June 30, 2022

Supported Employment – Report Narrative

Due to staffing limitations, many CMHCs had difficulty recruiting and retaining Supported Employment Specialists. Consequently, this affected the CMHCs' ability to provide Support Employment services in their respective catchment areas. Some difficulty was experienced by multiple CMHCs, early in the fiscal year, with mapping Supported Employment services to the Data Warehouse. However, these issues were subsequently resolved. Per the Data Warehouse, 541 individuals received Supported Employment services during Fiscal Year 2022. The Monthly Grant Outcome Table located in this report reflects the number of individuals served based on monthly paper documentation from the CMHCs. Per the Monthly Grant Service Outcomes submitted via paper, 475 individuals were served through Supported Employment. The discrepancy between the Data Warehouse reported data and the Monthly Grant Service Outcome data is likely attributed to differentiation between "enrolled" and "served," and successful mapping of service provision from the respective EHR to the Data Warehouse. Additionally, 219 individuals were reported to have been employed during Fiscal Year 2022. It should be further noted that differences may occur in total number of individuals served between the County of Residence and the Regional CMHC data breakdown. The County of Residence reporting mechanism is attached to each unduplicated individual regardless of where the individual received services. The Data Warehouse analytics defined an "unduplicated individual" in such a manner that a single individual within a respective CMHC may be counted more than once, if the individual was served at multiple designated facilities within the respective agency (e.g., Region X main office, Region X satellite office). Additionally, individuals served by more than one CMHC, in a given service, may be represented in the Regional CMHC breakdown for all impacted agencies. Therefore, it is possible to have more individuals represented as being served in the Regional CMHC breakdown compared to the County of Residence breakdown. Reporting mechanisms will be tightened and narrowed in Fiscal Year 2023. With respect to Supported Employment, this distinction means that 528 unduplicated individuals were reported to receive a Supported Employment service by the County of Residence report and 541 per the Regional report. Therefore, 13 individuals were served at multiple designated facilities within the respective agencies.

Peer Support Services
Individuals Served by County of Residence
July 1, 2021 - June 30, 2022

Peer Support – Report Narrative

The Peer Support, 15 min, referenced in this report and related data metrics, is specific to Peer Support services provided outside of bundled services such as PACT, ICORT, CSU, and Mobile Crisis. The Peer Support, 15 min, reference above also does not include peer support or peer bridger services provided at the state psychiatric hospitals. However, inconsistencies were noted in reporting over the Fiscal Year 2022 period, and additional guidance was provided. Therefore, the potential exists for some overlap, as EHRs were reconfigured to only report stand-alone Peer Support to this service code.

It should be further noted that differences may occur in total number of individuals served between the County of Residence and the Regional CMHC data breakdown. The County of Residence reporting mechanism is attached to each unduplicated individual regardless of where the individual received services. The Data Warehouse analytics defined an “unduplicated individual” in such a manner that a single individual within a respective CMHC may be counted more than once, if the individual was served at multiple designated facilities within the respective agency (e.g., Region X main office, Region X satellite office). Additionally, individuals served by more than one CMHC, in a given service, may be represented in the Regional CMHC breakdown for all impacted agencies. Therefore, it is possible to have more individuals represented as being served in the Regional CMHC breakdown compared to the County of Residence breakdown. Reporting mechanisms will be tightened and narrowed in Fiscal Year 2023. With respect to Peer Support Services, this distinction means that 2,405 unduplicated individuals were reported to receive a Peer Support Service by the County of Residence report and 2,437 per the Regional report. Therefore, 32 individuals were served at multiple designated facilities within the respective agencies.

Monthly Grant Service Outcome Data Metrics

As part of each respective grant requirement, each CMHC is required to submit monthly grant service outcome reports, via paper submission, to the Mississippi Department of Mental Health. Each CMHC completes the required reports and submits these reports to the Division of Adult Community Mental Health Services, Bureau of Behavioral Health Services. During Fiscal Year 2022, considerable efforts were made to streamline and standardize these reporting mechanisms, with further plans in Fiscal Year 2023 to eliminate the paper reporting mechanism and to focus on a single data source, the Data Warehouse.

Differences in calculation methods, operational definitions, and staff communication have been identified as areas in need of attention during Fiscal Year 2023. For instance, as noted in the table below, significant discrepancies in reporting manner were found in CSS data reporting. Some providers reported number of encounters, while others interpreted the request to include referrals. Such variability along a data reporting continuum affects the interpretation and explanations which can be culled during review and monitoring.

Monthly Grant Service Outcome Data Metrics (July 1, 2021 – June 30, 2022)						
Region	PACT Unduplicated Individuals Served	ICORT Unduplicated Individuals Served	ICSS Unduplicated Individuals Served	CSS Encounters (Not unduplicated)	Supported Employment Unduplicated Individuals Served	CSU Admissions

Key Terms & Definitions

- **Core Services:** The set of services for adults with serious mental illness identified in the Remedial Order as being key to the prevention of unnecessary hospitalization in state psychiatric hospitals. These services are: Mobile Crisis Teams, Crisis Stabilization Units, Programs of Assertive Community Treatment, Intensive Community Outreach and Recovery Teams, Intensive Community Support Services, Permanent Supported Housing, Supported Employment, Peer Support, and Community Support Services.
- **County of Referral:** County of Referral means the county in which a referral was initiated for a given service.
- **County of Residence:** County of Residence refers to each person's county of residence based on the person's reported address in the respective CMHC's Electronic Health Record.
- **Data Warehouse:** System utilized by the Mississippi Department of Mental Health for capturing data from certified providers for federal and state reporting
- **DMH Operational Standards:** The *Mississippi Department of Mental Health Operational Standards for Mental Health, Intellectual/Developmental Disabilities, and Substance Use Community Service Providers*, commonly referred to as the *DMH Operational Standards*, is DMH's published set of promulgated rules for agencies which are certified or are seeking certification by the Mississippi Department of Mental Health. This document is part of Administrative Code through the Mississippi Secretary of State's Office.
- **Missing Data:** Missing Data does not refer to the absence of data, but rather an element of data entered (e.g., individual served was reported but County of Residence was missing).
- **Mississippi United to End Homelessness (MUTEH) and Open Doors Homeless Coalition (ODHC):** Housing agencies which process DMH-funded CHOICE housing vouchers
- **Out of State:** Out of State refers to a person being served in Mississippi with a reported residence outside of Mississippi.
- **Statewide Capacity to Serve:** The capacity of a fully staffed service team at any single point in time
- **Web Infrastructure for Treatment Services (WITS):** System utilized by the Mississippi Department of Mental Health for capturing data from certified providers for federal and state reporting
