Introduction & Purpose

The Mississippi Department of Mental Health is committed to supporting the provision of an array of adult mental health services. Over the past several years, many adult mental health services and supports have been expanded and new ones implemented, including, but not limited to, the following:

- ✓ Mobile Crisis Response Teams
- ✓ Crisis Residential Services (also referred to as Crisis Stabilization Units or CSUs)
- ✓ Programs of Assertive Community Treatment Teams (PACT)
- ✓ Intensive Community Outreach and Recovery Teams (ICORT)
- ✓ Intensive Community Support Services (ICSS)
- ✓ Permanent Supported Housing
- ✓ Supported Employment
- ✓ Peer Support Services and
- ✓ Community Support Services (CSS).

These adult mental health services are referred to in this report as “Core Services.” The key aims of these adult mental health services are to provide people with access to local crisis service options, to enable people to be served in their communities, and to help people avoid unnecessary hospitalization. DMH is also working to enhance transition planning as people return to their communities from state hospitals, and the agency is committed to people receiving services in their own communities to meet their specific needs.

To facilitate these goals, DMH is continuing efforts to monitor community-based and state-operated mental health services for adults in our state. Adult mental health service provision data outcomes, such as the ones included in this report, are crucial in supporting the agency’s mission. Data informatics allow DMH to make decisions about the services available to Mississippians and to strategize, plan and allocate resources, accordingly.

A strong mental health workforce equipped to address the unique needs of our state is also a fundamental aspect of quality service provision. Over the past fiscal year, to address the training needs of our workforce and to support them in developing the tools needed to craft a service delivery system predicated on community and choice, DMH has offered provider technical assistance across the public mental health service delivery system and has specifically provided to the regional Community Mental Health Centers (CMHCs) technical assistance in the above-listed adult mental health service areas. DMH has also continued to offer professional development opportunities for adult mental health services staff working in the public mental health system through DMH’s professional credentialing programs. These technical assistance and workforce development initiatives are also featured in this report.

DMH wants to promote hope, recovery, and resiliency for adults with mental health needs by supporting a continuum of care in Mississippi. DMH is inspired by the future and encouraged by ways we can continue to partner with people, families, organizations, and communities for the benefit of the people we serve.

Adult Mental Health Services – Data Report Items

The following adult mental health services data items for Fiscal Year 2023 are covered in this report:

- Technical Assistance to providers including competency-based training, consultation, and coaching; provided by persons who have demonstrated substantial experience in implementing the adult mental health services of Mobile Crisis Response Teams, Crisis Residential Services (also referred to as Crisis Stabilization Units or CSUs), Programs of Assertive Community Treatment Teams, Intensive Community Outreach and Recovery Teams, Intensive Community Support Services, Permanent Supported Housing, Supported Employment, Peer Support Services, and Community Support Services.

- DMH Professional Licensure and Certification (PLACE) credentialing data for Fiscal Year 2023: DMH Mental Health Therapists and DMH Community Support Specialists.
- Admissions to Residential Crisis Services locations, by location broken down by Community Mental Health Center (CMHC) region and by county, and admissions to State Hospitals from Residential Crisis Services and where Residential Crisis Services were not provided.
- Calls to Mobile Crisis Teams, with the number of calls leading to a mobile team visit, the average time from call to visit, the number of calls where the time to visit exceeded limits in the applicable *DMH Operational Standards* rule, and the disposition of call and/or Mobile Team Visit.
- Civil Commitments to State Hospitals by CMHC region and by county.
- Jail placements pending State Hospital admission by CMHC region and county, including length of placement.
- Individuals who remain hospitalized in State Hospitals for over 180 days.
- Persons receiving each Core Service (as listed on page 3 of this report) by CMHC region and/or by county.

Data Review - Background & Methodology

In Fiscal Year 2021, the Mississippi Department of Mental Health (DMH) hired a Chief Clinical Officer for the DMH Bureau of Behavioral Health Services and in Fiscal Year 2022, DMH established the DMH Office of Utilization Review. These efforts were initiated, in part, to support accurate data collection and reporting from adult mental health services providers, to engage in data review of the adult mental health services identified in this report, and to monitor corresponding data outcomes for the purposes of enhancing service provision and assuring proper allocation and utilization of resources.

Beginning in Fiscal Year 2022, data validation and reconciliation efforts were initiated by the Chief Clinical Officer with Mississippi's regional Community Mental Health Centers (CMHCs). These efforts included conducting meetings with each of the CMHCs and specifically requiring the participation of the CMHC Executive Director (and/or a CMHC representative) as well as programmatic and data analytic staff. At the onset of Fiscal Year 2022, CMHC Executive Directors were informed of the new review and monitoring process with the expressed purpose of confirming the accuracy and reliability of the submitted monthly data through a data validation and reconciliation process. This process also served as a feedback mechanism to assist the CMHC community providers in improving their data tracking and reporting mechanisms and processes. Data validation and reconciliation processes focus on missing or incorrect values, duplicated records, corrupted values through provider Electronic Health Records (EHRs), as well as the clinical significance and meaningfulness of data reporting and successful data outcomes. Data Validation and Reconciliation Call Summaries, summarizing the content of the meetings, the data discussed, noted discrepancies, and plans to address or reconcile errors or concerns, were introduced in January 2022. Both the Chief Clinical Officer as well as the CMHC Executive Director and/or identified representative sign and date each call summary. Data Validation calls continued into Fiscal Year 2023, being held quarterly for assessment and reconciliation purposes.

Data Validation and Reconciliation efforts were documented for each Community Mental Health Center (CMHC) in respective data spreadsheet workbooks. Data Validation and Reconciliation efforts throughout Fiscal Year 2023 focused on comparisons and discrepancies between data submissions from the CMHCs' respective Electronic Health Records (EHRs) and the Mississippi Department of Mental Health's Data Warehouse. These workbooks were updated prior to each Data Validation and Reconciliation call. The workbooks included review and monitoring of the following data points: Crisis Stabilization Unit Admissions, Crisis Residential Services (individuals served and units of service), Programs of Assertive Community Treatment (PACT) (individuals served and units of service), Intensive Community Outreach and Recovery Teams (ICORT) (individuals served and units of service), Intensive Community Support Services (ICSS) (individuals served and units of service), Community Support Services (individuals served and units of service), Supported Employment Services (individuals served and units of service), Peer Support Services (individuals served and units of service), and Community Living (individuals served and units of service).

Although documented, units of service were not a primary focus of review during Fiscal Year 2023. Units of service vary depending on the nature of each CMHC's reporting methods in the provider's EHR (varying from billable units to unit

equivalents of minutes or hours of service). Rather, the development of consistent and reliable data related to unduplicated individuals served was the primary focus during Fiscal Year 2022 and Fiscal Year 2023 data validation meetings.

As Fiscal Year 2023 progressed, significant progress was seen in comparing and reconciling discrepancies between EHR data submissions and the DMH Data Warehouse data. These data validation efforts continue as progress is made in reconciling data with errors from previous years in the EHR systems. For Fiscal Year 2024, previous record errors and the expansion of data monitoring efforts will be focuses of attention.

In Fiscal Year 2022, a Mobile Crisis Data Module was developed in the DMH Web Infrastructure for Treatment Services (WITS) system for the CMHCs to use to submit their Mobile Crisis call response data to DMH. During the initiation phase, DMH held training sessions to teach CMHC Mobile Crisis Teams how to input their data. DMH also distributed a “Frequently Asked Questions” document and a corresponding reference manual to each of the CMHC Mobile Crisis Response Teams. CMHCs were asked to test the WITS Mobile Crisis Module during the fourth quarter of Fiscal Year 2022 (April – June 2022). Additionally, inclusion of the WITS Mobile Crisis Module data in the above-described Data Validation and Reconciliation reviews began in April 2022.

On July 1, 2022, the Mobile Crisis Module in WITS went “live” and became the official platform for the CMHCs to submit their Mobile Crisis Response data to the Mississippi Department of Mental Health. At the beginning of Fiscal Year 2023, early Mobile Crisis Response WITS data review activities were focused on partnering with the CMHCs to define mobile crisis and the parameters for capturing and reporting data correctly as well as on identifying and correcting any origination issues, such as the user’s ability to bypass the mobile call disposition screen. In October 2022, DMH staff began monthly calls with the CMHCs to review their monthly Mobile Crisis Response data submissions through the WITS system. Data reconciliation efforts continue to be made with Mobile Crisis-related data across the state, specifically pertaining to differentiating between Mobile Crisis Services and Crisis Response Services.

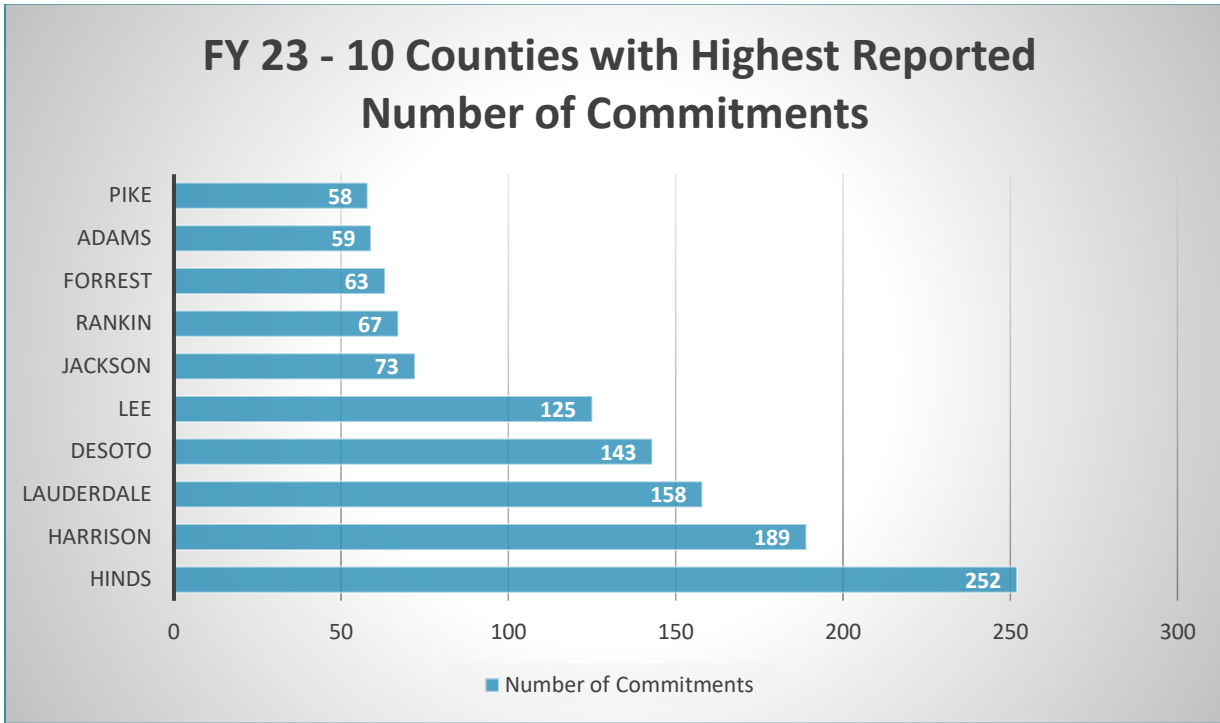

Towards the end of Fiscal Year 2023, training sessions were held between CMHCs and Mobile Crisis and Information Systems representatives at the Mississippi Department of Mental Health. WITS Crisis Module training sessions are expected to continue in Fiscal Year 2024, along with organizational processes in which Mobile Crisis data is entered at the regional level. Upcoming additions to the WITS Crisis Module include the option to track data by county and to track whether the response occurred in an urban or a rural setting.

The DMH Office of Utilization Review was begun in April 2022. This office is responsible for reviewing the utilization of behavioral health services for state-operated programs and key community-based services with a focus on preventing unnecessary hospitalizations. Collection of the following data indicators from the four (4) State Hospitals (SHs) was facilitated in Fiscal Year 2022 through the DMH Office of Utilization Review: State Hospital admissions from CSUs/SH admissions without having first been served at a CSU, civil commitments to State Hospitals by CMHC by region and county, jail placements pending State Hospital admission by region and county, and individuals who remain hospitalized in State Hospitals for over 180 days. These data collection efforts were continued and enhanced in Fiscal Year 2023.

In Fiscal Year 2023, Data Validation Calls relating to State Hospital-specific data indicators pertaining to hospital discharge planning and transition were initiated through the DMH Office of Utilization Review. State Hospital Directors and/or their hospital representatives participated in quarterly data validation calls with the Office of Utilization Review for the purpose of validating their monthly data submissions and correcting any noted data discrepancies. Following each Data Validation Call, State Hospital Directors sign their hospital’s subsequent validated data submission reports. In Fiscal Year 2024, the Office of Utilization Review’s data review and monitoring efforts will shift to an emphasis in coalescing data review activities among Mobile Crisis Services, other Adult Community Mental Health Core Services, and State-Operated Behavioral Health programs for the purpose of engaging in multi-level macro analyses, trending, and forecasting of service allocation, provision, and utilization across the public adult mental health service delivery system.

Key Findings – FY 2023

- The chart below illustrates the 10 counties which had the highest reported numbers of commitments for Fiscal Year 2023. County population data is provided for comparison purposes. The table on page 27 provides the commitment data for all 82 counties in Mississippi for Fiscal Year 2023.

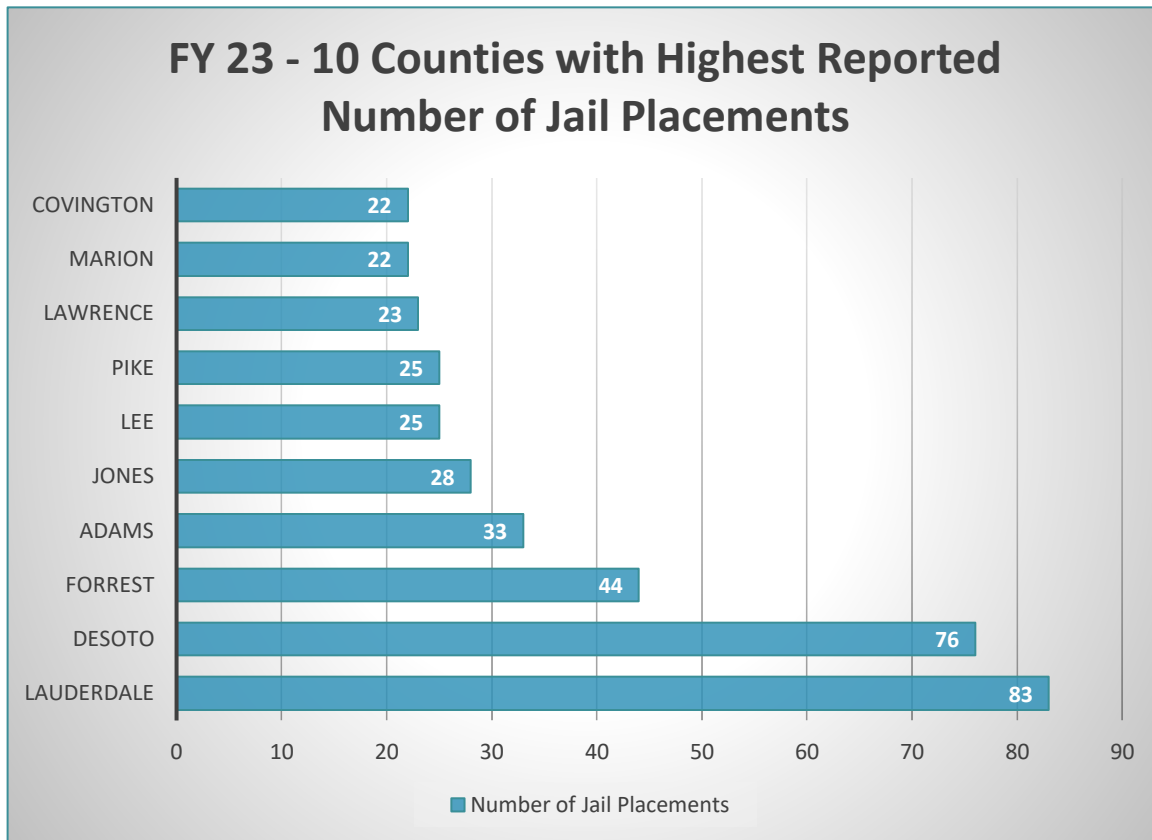

Data Source: Monthly self-reports submitted from the four (4) State Hospitals to DMH via partial data extraction from hospital Electronic Health Records (EHR) systems, supplemented with electronic and manual collection, review and reporting methods.

2022 County Population Data	
Pike	39,644
Adams	28,408
Forrest	78,110
Rankin	158,979
Jackson	144,975
Lee	82,959
DeSoto	191,723
Lauderdale	70,904
Harrison	211,044
Hinds	217,730

Data Source: Labor Market Information, Mississippi Department of Employment Security and U.S. Census Bureau

- The chart below illustrates the 10 counties for Fiscal Year 2023 which had the highest reported numbers of individuals admitted to a State Hospital who, prior to their state hospital admissions, were waiting in jail for an acute psychiatric commitment. The table on pages 28-31 provides jail placement information for all 82 counties in Mississippi for Fiscal Year 2023.

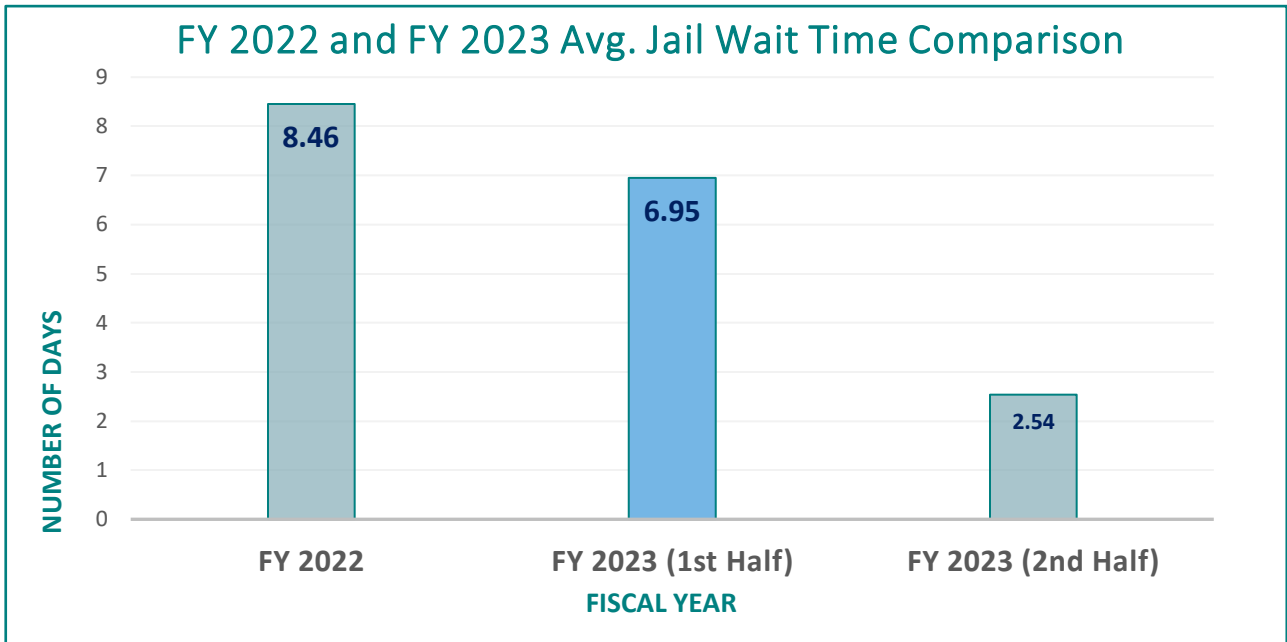

Data Source: Monthly self-reports submitted from the four (4) State Hospitals to DMH via partial data extraction from hospital Electronic Health Records (EHR) systems, supplemented with electronic and manual collection, review and reporting methods.

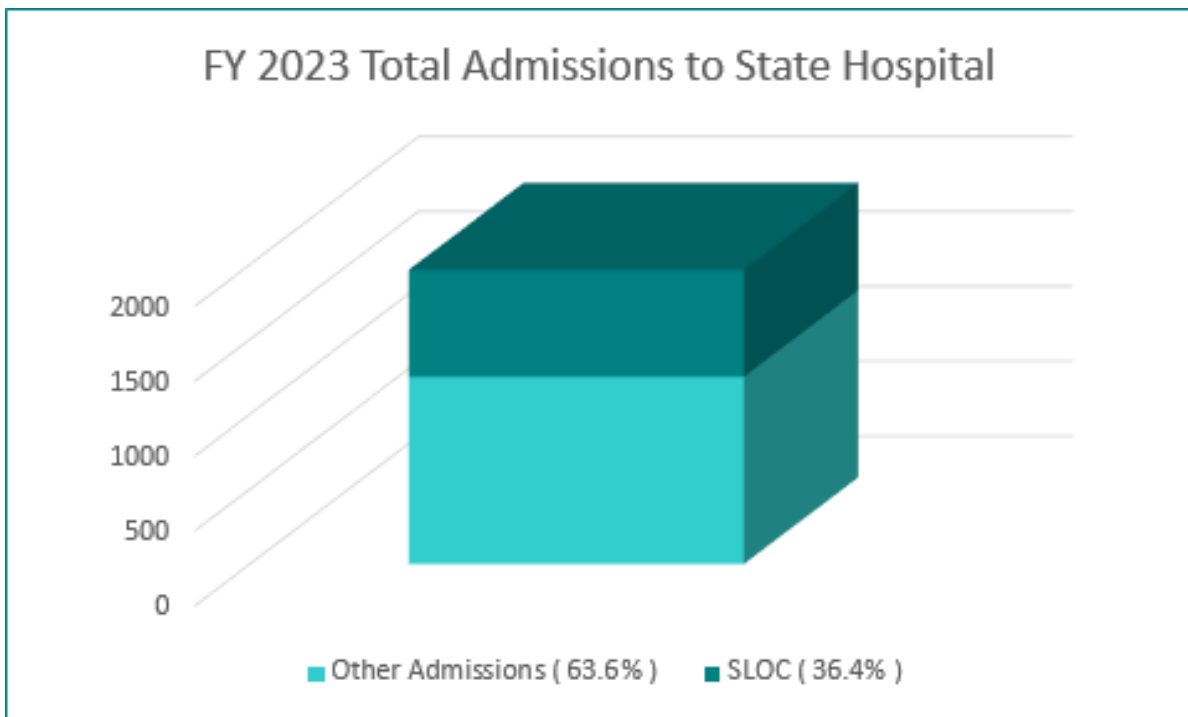

2022 County Population Data	
Covington	18,098
Marion	24,050
Lawrence	11,713
Pike	39,644
Lee	82,959
Jones	66,569
Adams	28,408
Forrest	78,110
DeSoto	191,723
Lauderdale	70,904

Data Source: Labor Market Information, Mississippi Department of Employment Security and U.S. Census Bureau

- As illustrated in the chart below, the average number of days individuals spent waiting in jail prior to a State Hospital admission (among all four (4) State Hospitals) decreased from an average of 8.46 days in Fiscal Year 2022 to an average of 6.95 days in the first half of Fiscal Year 2023, and an average of 2.54 days in the second half of Fiscal Year 2023. The table on pages 28-31 provides more specific information.

- A total of 1,965 State Hospital admissions (among all four (4) State Hospitals) were reported for Fiscal Year 2023. Of this total number of admissions, 715 (approximately 36.4%) were admissions from Same Level of Care (SLOC) programs.

Technical Assistance – Adult Mental Health Services

During Fiscal Year 2023, the Mississippi Department of Mental Health provided Technical Assistance in the Adult Mental Health Core Service areas (listed on page 3 of this report) to the regional Community Mental Health Centers (CMHCs). This TA was provided via web-based platform course offerings. All noted courses, except for the PACT/ICORT course, are web-based courses which were offered by SMI Adviser. The PACT/ICORT course is a web-based course which was developed and offered by the Mississippi Department of Mental Health. Technical Assistance (TA) completion by CMHC staff at the time of the TA offering period was verified by DMH via CMHC staff submission of signed TA completion forms. The TA offering period was March 24, 2023 – June 30, 2023.

During Fiscal Year 2023, a total of 955 course completions in the adult mental health core service areas were reported to DMH as completed by CMHC employees. Due to the nature of their work, some CMHC employees completed more than one (1) TA core service course. Therefore, while individual course participant numbers are considered an unduplicated count of CMHC employee participants, the total number of course completions listed beneath each regional CMHC table is not necessarily an unduplicated count of CMHC employees. Similarly, as indicated in the TA tables below, CMHC employee participation percentages are greater than 100 percent for some courses for some regions. In these instances, the numbers of CMHC employees for whom documentation was submitted to DMH to verify participation in the TA course(s) exceeded the number of CMHC employees reported by the respective CMHC as being employed in the corresponding core service area (primary role or back-up role) during the TA offering period.

On July 1, 2023, Region 11 CMHC ceased operations; counties in the Region 11 CMHC catchment area were divided between CMHC Regions 12 and 15. Because this transition occurred immediately following the conclusion of Fiscal Year 2023, the number of former Region 11 employees reported as working in the Core Services Areas during the TA offering period was not available at the time of report tabulation. Rather, only the numbers of Region 11 CMHC TA participants, per course, is available.

FY 2023 - Technical Assistance Course Completions by CMHCs

Region 2 CMHC

Core Service	TA Course	Number of Participants	Number reported by CMHC as employed in Core Service Area (during FY 2023 TA period)	Participation Percentage (%) by Course
Mobile Crisis Teams	Peer Support Engagement Skills on Mobile Crisis Teams - SMI Adviser	7	8	87.5%
Crisis Residential Services (CSU)	Expanding the Evidence Base for the Crisis Care Continuum: Call Centers, Mobile Teams, and Stabilization Units- SMI Adviser	7	7	100%
PACT/ICORT	PACT/ICORT and Mississippi's System of Care-DMH	10	10	100%
Intensive Community Support Services/ Specialists (ICSS)	Care Transition Interventions That Facilitate Connections with Community Providers and Decrease Hospital Readmissions- SMI Adviser	9	11	81.8%

Core Service	TA Course	Number of Participants	Number reported by CMHC as employed in Core Service Area (during FY 2023 TA period)	Participation Percentage (%) by Course

FY 2023 Additional Technical Assistance – Mobile Crisis

Under the new State Technical Assistance (TA) Project funded by the Substance Abuse and Mental Health Services Administration (SAMHSA), the National Association of State Mental Health Program Directors (NASMHPD) and the NASMHPD Research Institute (NRI) held a State Peer-to-Peer Learning Session, “Staffing Models for Mobile Crisis Teams to Promote 24/7 Coverage.” This interactive virtual learning session was held on June 29, 2023. The following CMHCs participated in the training session.

CMHC	CMHC Team Members who attended training
Region 2	Crisis Coordinator Executive Director
Region 4	Crisis Coordinator
Region 6	Mobile Crisis Coordinator Mobile Crisis Therapist Mobile Crisis Therapist
Region 9	Director of Adult Services Data Entry Staff Member Crisis Coordinator Mobile Crisis Peer Support Specialist
Region 12	Crisis Administrator Crisis Team Member Crisis Team Member Mobile Crisis Therapist Mobile Crisis Community Support Specialist
Region 15	Deputy Executive Director

***The LCMHT and CCSS-II levels of credentialing were discontinued effective January 2009. Though no longer available to new applicants, those who obtained the LCMHT or CCSS-II credential prior to discontinuance may continue to renew it as long as renewal requirements are met.*

Technical Assistance - DMH Professional Credentialing – Report Narrative

During Fiscal Year 2023, a total of 115 individuals were awarded the DMH Certified Mental Health Therapist (CMHT) credential. To obtain this credential, an individual must, among other requirements, successfully complete the DMH Mental Health Therapist Examination. The DMH Mental Health Therapist Examination is predicated on a customized collection of web-based training behavioral health courses through the Relias Learning System; two (2) of these courses are in the adult mental health core service areas of peer support and crisis response, respectively:

- Introduction to Peer Support for Peer Support Professionals
- Recognizing and Responding to a Person in Crisis.

During Fiscal Year 2023, a total of 46 individuals were awarded the DMH Certified Community Support Specialist (CCSS) credential. To obtain this credential, an individual must, among other requirements, successfully complete the DMH Community Support Specialist program web-based exam/training component. This component is predicated on a customized collection of web-based training behavioral health courses through the Relias Learning System; three (3) of these courses are in the adult mental health core service areas of community support, crisis response, and assertive community treatment, respectively:

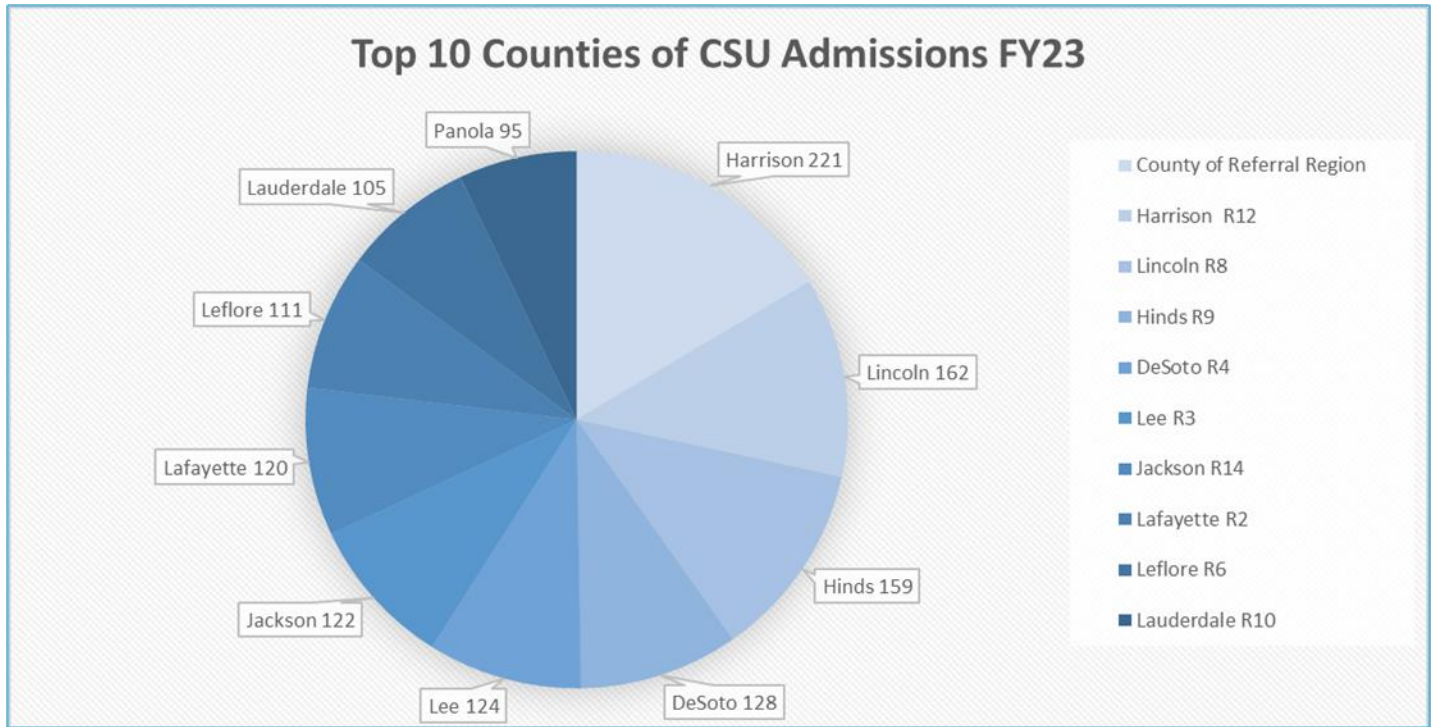

- Case and Care Management
- Recognizing and Responding to a Person in Crisis
- Overview of Assertive Community Treatment.

As of June 30, 2023, a total of 993 individuals held the DMH Certified Mental Health Therapist (CMHT) and DMH Licensed Clinical Mental Health Therapist (LCMHT) credentials, collectively. One (1) of the requirements to maintain the CMHT and LCMHT credentials is completion of a biennial renewal requirement of 30 CE hours. Relias Learning and SMI Adviser are both e-learning platforms which may be utilized for completion of applicable CE hours for credentialing renewal.

As of June 30, 2023, a total of 630 individuals held the DMH Certified Community Support Specialist (CCSS) and Certified Community Support Specialist II (CCSS-II) credentials, collectively. One (1) of the requirements to maintain the CCSS and CCSS-II credentials is completion of a biennial renewal requirement of 24 CE hours. Relias Learning and SMI Adviser are both e-learning platforms which may be utilized for completion of applicable CE hours for credentialing renewal.

Data Reports – Adult Mental Health Services

Admissions to Residential Crisis Services by Region and County

Admissions to Residential Crisis Services by Region and County – Report Narrative

During Fiscal Year 2023, Crisis Stabilization Unit admissions were captured through two (2) different data reporting mechanisms. The first data reporting mechanism involved each Crisis Stabilization Unit, run by the respective Regional Community Mental Health Center (CMHC), submitting a monthly grant outcome form to the DMH Division of Adult Services. This monthly grant outcome form included, but was not limited to, the following data fields: “Total Number of Admissions” and “County of Referral for Admitted Individuals.” This information was then entered into a database for tracking and monitoring. It should be noted that the “Total Number of Admissions” is not unduplicated. Therefore, this number captures total admissions, including an individual who may have been served multiple times, at multiples CSUs, throughout the state during the designated reporting period. The second data reporting mechanism includes data transfers (both crisis residential service provision and Crisis Stabilization Unit admissions, differentiated by Regional Community Mental Health Centers, County of Residence, and County of Service Location) from each respective CMHC’s Electronic Health Record (EHR) to the DMH Data Repository, the Data Warehouse. For this report, 3,402 admissions were reported by the CMHCs for July 1, 2022- June 30, 2023. These admissions and county breakdowns were carefully reviewed, and the top 10 counties for CSU admissions are listed in the chart above from greatest to least in a clockwise fashion.

At the end of Fiscal Year 2022, there were a total of 184 CSU beds across the regions; however, the Marks, Mississippi, CSU closed in January 2023, and the Natchez, Mississippi, CSU added four (4) additional beds in December 2022.

July 1, 2022 - June 30, 2023			
CSU	Region	Crisis Stabilization Unit Admissions	CSU Bed Capacity

State Hospital Admissions/Crisis Residential Services

July 1, 2022 – June 30, 2023		
State Hospital Admissions/Crisis Residential Services Report		
State Hospital	Number of Individuals admitted to State Hospitals from Crisis Residential Services	Number of individuals admitted to State Hospitals without having first been served in Crisis Residential Services
Mississippi State Hospital (MSH)	78	656
North Mississippi State Hospital (NMSH)	69	320
East Mississippi State Hospital (EMSH)	50	393
South Mississippi State Hospital (SMSH)	55	344
Total	252	1713

State Hospital Admissions/Crisis Residential Services - Report Narrative

For Fiscal Year 2023, monthly self-reports were submitted from the four (4) State Hospitals to DMH via partial data extraction from hospital Electronic Health Records systems, supplemented with electronic and manual collection, review and reporting methods. Two (2) data items were submitted from each hospital: 1) the number of individuals admitted to state hospitals

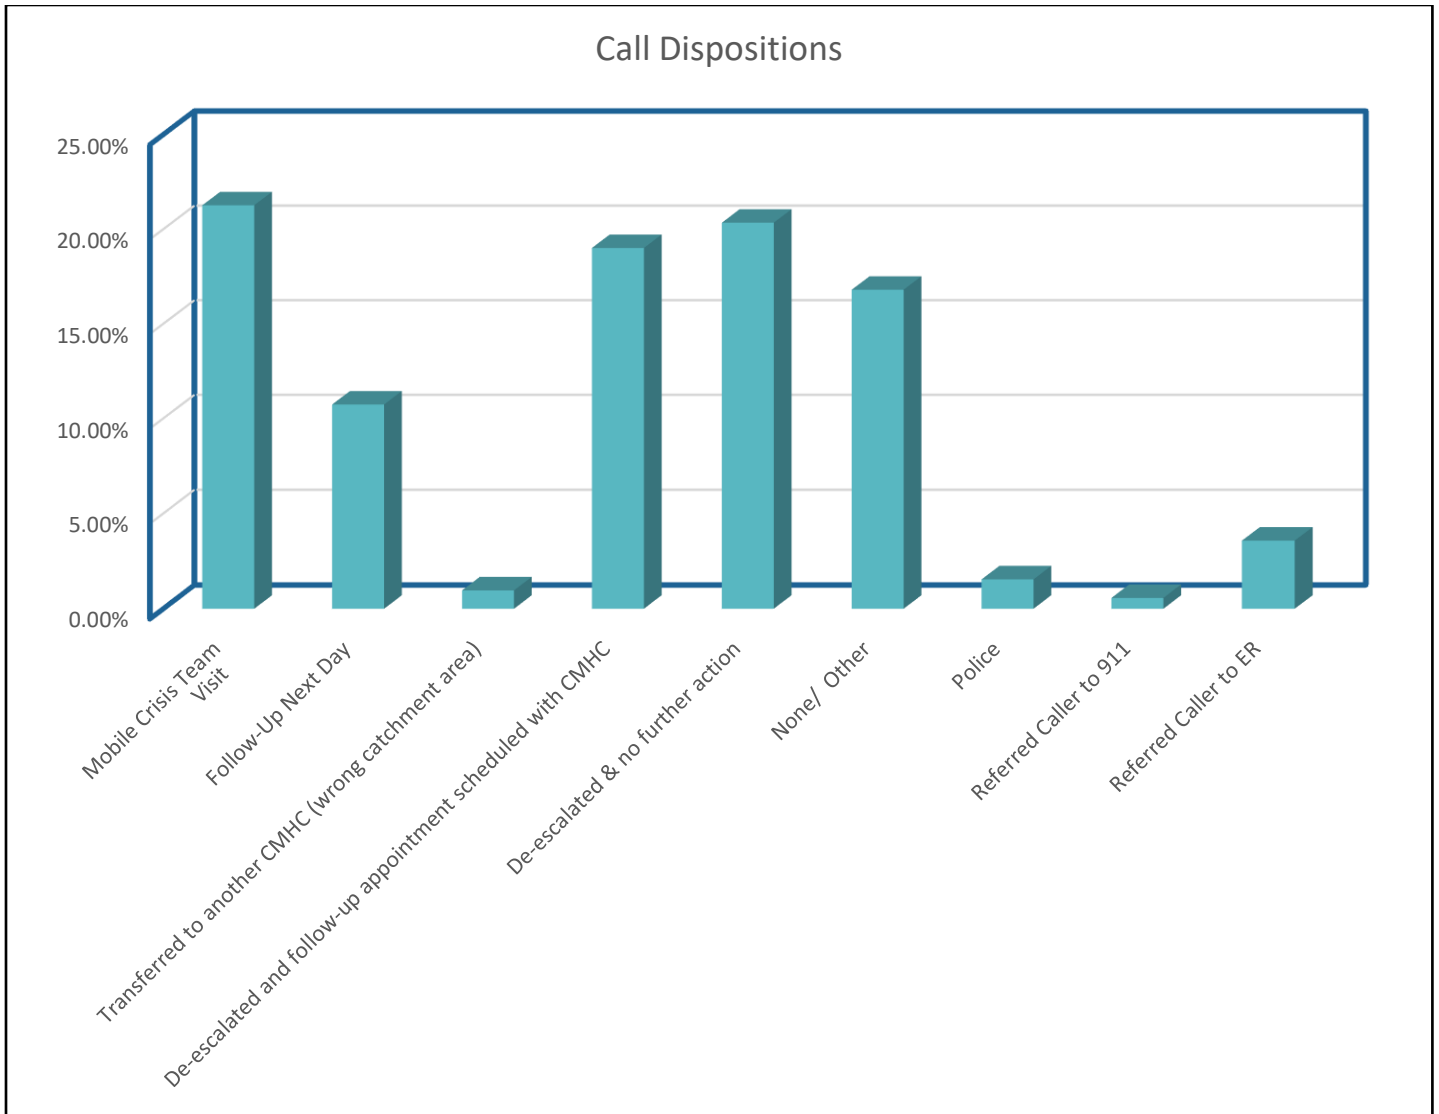

from Crisis Residential Services and 2) the number of individuals admitted to state hospitals without having first been served in Crisis Residential Services.

Same Level of Care (SLOC) Admissions: A total of 1,965 State Hospital admissions (among all four (4) State Hospitals) were reported for Fiscal Year 2023. Of this total number of admissions, 715 (approximately 36.4%) were admissions from Same Level of Care (SLOC) programs.

Mobile Crisis Response Team Calls - Report Narrative

As previously indicated, the WITS Crisis Module went “live” on July 1, 2022. CMHCs were asked to test the system during the fourth quarter of Fiscal Year 2022 (April – June 2022). Training sessions were held to teach Mobile Crisis Teams how to input data into the WITS Crisis Module system. A “Frequently Asked Questions” document and a reference manual were distributed to all Mobile Crisis Response Teams.

Each month, Mobile Crisis Response data is examined by DMH leadership staff; this data is also reviewed by fidelity reviewers throughout the year as well as prior to each mobile crisis fidelity site visit. Throughout this review process, data fields are continually refined to meet the needs of DMH staff and Mobile Crisis Teams, and identified errors are corrected in the system. Beginning March 31, 2023, and continuing into Fiscal Year 2024, monthly WITS data review meetings are held; these meetings include an Information Systems representative from DMH, a Crisis System Coordinator at DMH, and the CMHC Mobile Crisis Response Teams. During these meetings, data issues and/or data discrepancies are identified and reviewed. The Crisis System Coordinator then meets with Mobile Crisis Team Coordinators and/or representative(s) working on data entry at the CMHCs to review any noted issues and to make corresponding corrections. Additionally, in January 2023, a WITS user refresher training began being conducted with each CMHC region; this training is being provided on an ongoing basis, as needed. Upcoming additions to the WITS Crisis Module system include adding the capacity to track data by county as well as by whether the response occurred in an urban or a rural setting.

Civil Commitments to State Hospitals by CMHC by Region and County – Report Narrative

For Fiscal Year 2023, monthly self-reports were submitted from the four (4) State Hospitals to DMH via partial data extraction from hospital Electronic Health Records (EHR) systems, supplemented with electronic and manual collection, review and reporting methods. This report is organized by CMHC region and by county. The county-level aspect of this report is based on the counties in which the corresponding commitment orders to the respective state hospitals were issued.

For Fiscal Year 2023, a total of 2,606 commitments to State Hospitals were reported. A total of 1,965 acute adult psychiatric admissions to state hospitals were reported for this same time frame. As these numbers indicate, not all commitments resulted in corresponding state hospital admissions (due to such factors as successful diversions from a state hospital level of care and persons being served by private, same level of care providers). Data validation and reconciliation efforts comparing the number of state hospital admissions to the number of commitments and the number of admissions first served by Crisis Residential Services was begun in Fiscal Year 2022 and continued in Fiscal Year 2023.

Jail Placements pending State Hospital Admission by Region and County – Report Narrative

This report consists of data reflecting the numbers of individuals who were admitted to a state hospital who, prior to their hospital admissions, had been waiting in jail for an acute psychiatric commitment. The information in this report is estimated to be an unduplicated count of individuals. By county, CMHC region, and each individual state hospital, this report delineates the number of individuals reported to be in jail prior to hospital admission and the corresponding average number of days in jail. The report also provides the overall total number of individuals awaiting admission and the overall average wait time in jail among all four (4) hospitals. For Fiscal Year 2023, coalescing the data submitted from all four (4) hospitals, the overall average length of time spent in jail awaiting a state hospital admission was reported to be approximately 4.77 days (first half of Fiscal Year 2023 – average of approximately 6.95 days; second half of Fiscal Year 2023 – average of approximately 2.54 days). The data source for this report is as follows: monthly self-reports submitted from state hospitals to DMH via partial data extraction from hospital Electronic Health Records (EHR) systems, supplemented with electronic and manual collection, review and reporting methods.

Individuals who remain hospitalized in State Hospitals for over 180 days

July 1, 2022 – June 30, 2023	
FY 2023 Individuals hospitalized in State Hospitals for Over 180 days	
State Psychiatric Hospital	# of Individuals Hospitalized for > 180 days
North Mississippi State Hospital (NMSH)	10
South Mississippi State Hospital (SM SH)	4
East Mississippi State Hospital (EMSH)	66
Mississippi State Hospital (MSH)	65
Totals among all four hospitals	145

Individuals who remain hospitalized in State Hospitals for over 180 days - Report Narrative

This report is comprised of monthly self-reports submitted from the four (4) State Hospitals to DMH via partial data extraction from hospital Electronic Health Records (EHR) systems, supplemented with electronic and manual collection, review and reporting methods. It includes an unduplicated count of the number of individuals at each state hospital with a hospital length of stay which exceeded 180 days during the covered time frame (Fiscal Year 2023). This report excludes the following patient populations: forensic, nursing home, substance use primary/Chemical Dependency Unit, and children/adolescents.

Adult Mental Health Core Services

(Mobile Crisis Response Team data is included on pages 25-26 of this report.)

- ✓ Crisis Residential Services (also referred to as Crisis Stabilization Units or CSUs)
 - ✓ Programs of Assertive Community Treatment Teams (PACT)
 - ✓ Intensive Community Outreach and Recovery Teams (ICORT)
 - ✓ Intensive Community Support Services (ICSS)
 - ✓ Community Support Services (CSS)
 - ✓ Permanent Supported Housing
 - ✓ Supported Employment and
 - ✓ Peer Support Services.
-
- Reported data points for the Adult Mental Health Core Services of CSU, PACT, ICORT, ICSS, CSS, Permanent Supported Housing, Supported Employment, and Peer Support Services were extracted from the Data Warehouse, the Department of Mental Health's data repository. The Data Warehouse system only accepts established "patients"/individuals with each respective CMHC and is based on accurate and reliable data transfer from each CMHC's respective EHR to the Data Warehouse. This method includes having the noted data fields correctly mapped to the correct service codes in the Data Warehouse and requires that the data submissions be entered correctly into the respective EHRs in a timely manner. Reports for the July 1, 2022 – June 30, 2023, service period were generated on August 21, 2023. These reports are an accurate representation of the data available to review in the Data Warehouse as of this date.
 - Region 11 CMHC has minimal data available for review in the Data Warehouse. Due to transition of this CMHC's EHR and lack of interface with the Data Warehouse, Region 11 staff were responsible for manually entering their service data to WITS. WITS then transferred their manually entered data to the Data Warehouse. It is important to note that the limited Region 11 data in the Data Warehouse affects all service provision data and should be interpreted as an overall underestimation of service provision.
 - It should be further noted that differences may occur in the total number of individuals served between the Data Warehouse and the graph depictions, as Data Warehouse filters out duplicated individuals for its total, and the graphics displayed cannot examine the Unique Client Identifier behind each number presented. The Data Warehouse reporting mechanism is attached to each unduplicated individual regardless of where the individual received services. The Data Warehouse analytics defined an "unduplicated individual" in such a manner that a single individual within a respective CMHC may be counted more than once, if the individual was served at multiple designated facilities within the respective agency (e.g., Region X main office, Region X satellite office). Additionally, individuals served by more than one CMHC, in a given service, may be represented multiple times in the displayed graphic breakdown for all impacted agencies, but are counted only once in the confirmed total as reported by the Data Warehouse.
 - "Unduplicated Individuals Served" signifies that an individual received a given service (e.g., PACT, ICORT, etc.). "Unduplicated" means that the individual is not counted more than once and is recognized as a distinct data point. An individual may be on an intensive service caseload. However, if the individual did not receive a service while on that caseload, then the person's service data would not be included in the Data Warehouse metrics. Data Warehouse metrics represent only individuals who have received a service.
 - The "Regional CMHC(s) who provided service" column discriminates which CMHCs provided a given service for individuals who reside in each respective county. For instance, in the *Crisis Residential Services* table below, 63 unduplicated individuals who resided in Coahoma County received Crisis Residential Services (i.e., services at a CSU) from Regions 1, 2, and 6. Although Coahoma County is in the Region 1 catchment area, individuals received care at CSUs outside of Region 1.

Crisis Stabilization Unit (CSU) Admissions and Crisis Residential Services – Report Narrative

The Batesville CSU, previously under the operation of Region 4, was transitioned to Region 2 in July 2022.

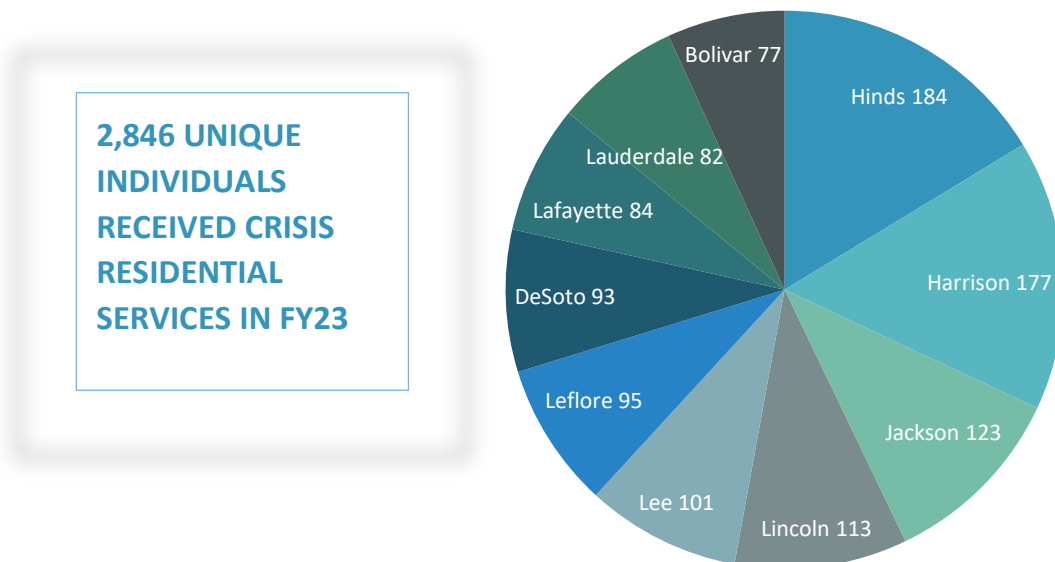

During Fiscal Year 2023, Region 11 continued to experience ongoing difficulty related to its EHR implementation and its interface with the Data Warehouse. Consequently, Region 11’s Crisis Residential Services data have not been successfully transferred to the Data Warehouse in a complete manner. Thus, Region 11 data is not fully represented in the above table. Region 11 reported, per the monthly grant outcome report, that Region 11 had 153 admissions from July 2022- June 2023.

Twenty-four (24) individuals received care at a CSU operated by Regions 2, 3, 4, 6, 8, and 10 whose records indicated that they resided outside the state of Mississippi. Thirty-eight (38) individuals received care at a CSU operated by Regions 3, 10, and 12; however, their county of residence information was “missing” from their service enrollments; these individuals were therefore listed as having “Missing Data.”

Asterisk (*) notations on the graphic above indicate regions which have two (2) CSUs.

Top 10 Counties of CSS Service Provision

Community Support Services (CSS) – Report Narrative

For Community Support Services (CSS) for Fiscal Year 2023, it should be noted that differences may occur in the total of individuals served between the numbers depicted within the charts and the unduplicated number of individuals as displayed in the total. Data Warehouse has filtered out the 134 duplicated individuals which may be present as served by other counties, or by counties who are “Missing Data.” The chart above displays the top 10 counties for CSS service provision. The chart below displays the regional breakdown of the total number of individuals served by CSS.

- **Permanent Supported Housing (CHOICE)**

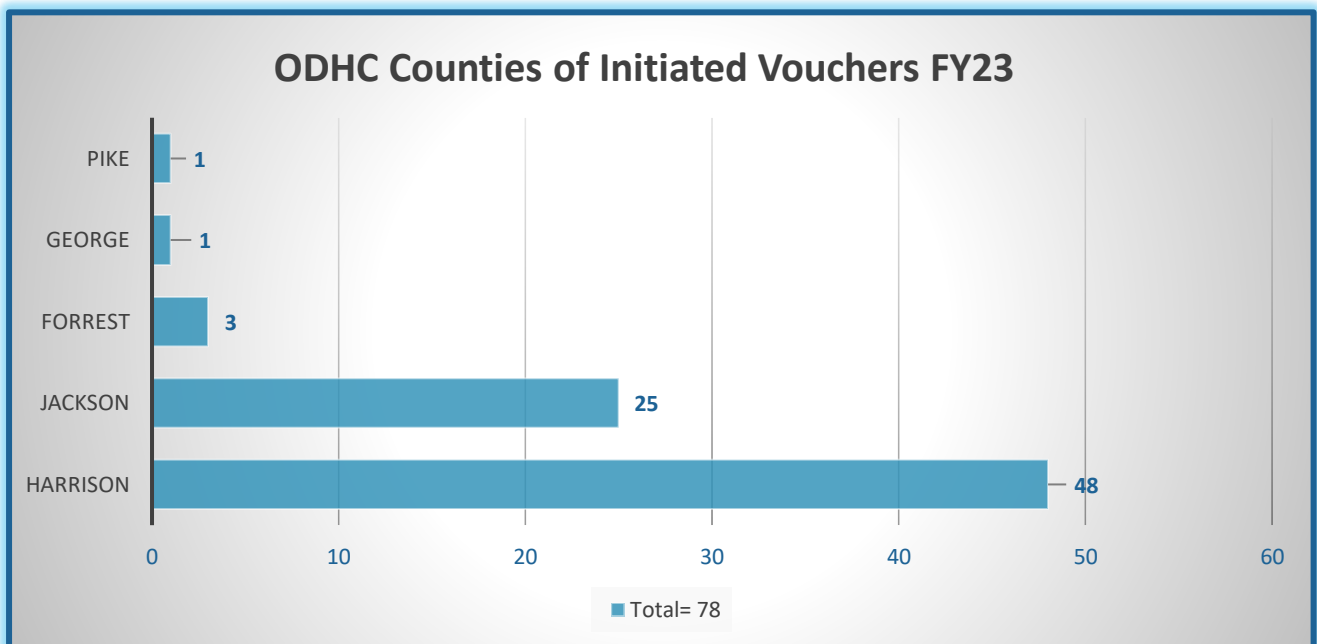

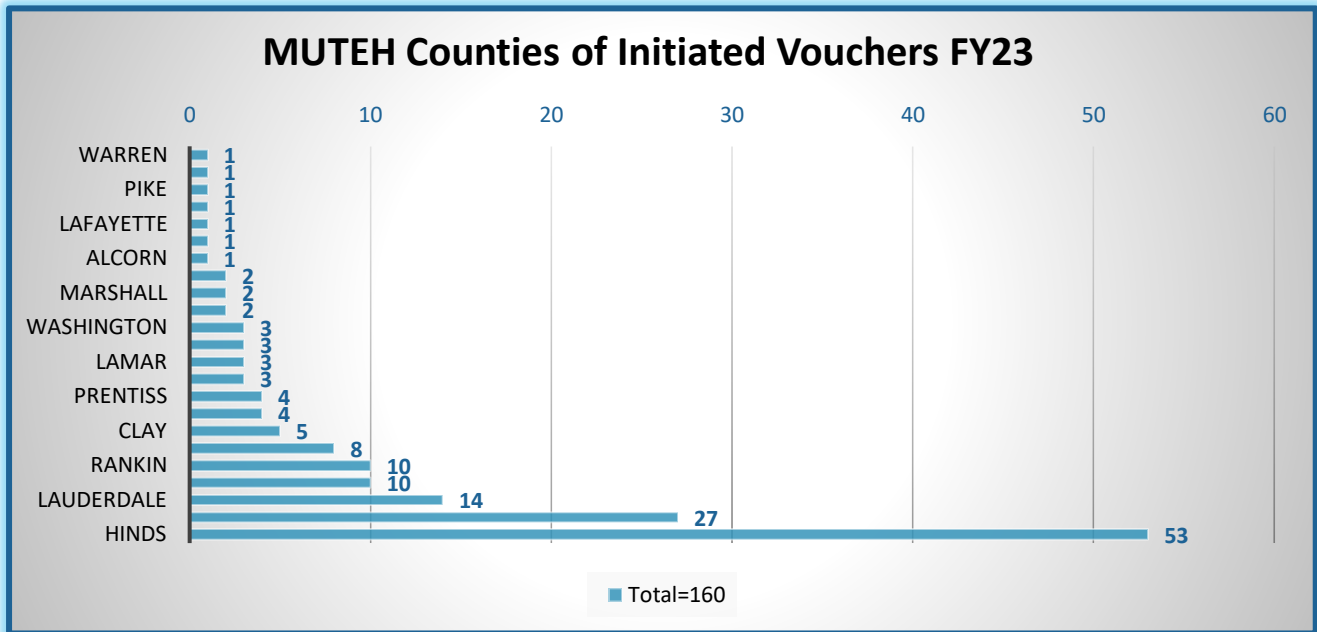

Mississippi United to End Homelessness (MUTEH)	
July 1, 2022 - June 30, 2023

George	1
Pike	1
78 Newly Initiated Housing Vouchers	

Permanent Supported Housing (CHOICE) – Report Narrative

Data reports were retrieved directly from Mississippi United to End Homelessness (MUTEH) and Open Doors Homeless Coalition (ODHC). A total of 238 CHOICE Vouchers were initiated during July 1, 2022 - June 30, 2023.

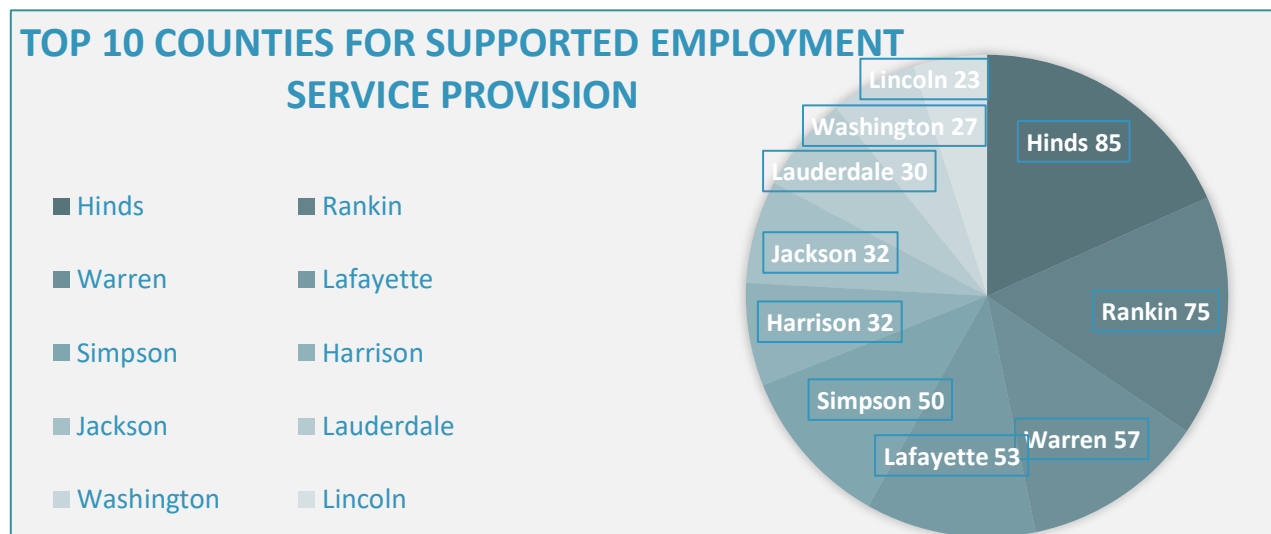

The graphs below display the number of vouchers initiated by county for Mississippi United to End Homelessness and Open Doors Homeless Coalition. It should be noted that for Fiscal Year 2024, Open Doors Homeless Coalition will be the only agency reporting voucher initiation; this organization is the primary housing partner with DMH for Fiscal Year 2024.

Supported Employment – Report Narrative

Due to staffing limitations, many CMHCs had difficulty recruiting and retaining Supported Employment Specialists. Consequently, this affected the CMHCs’ ability to provide Support Employment services in their respective catchment areas. Per the Data Warehouse, 708 individuals received Supported Employment services during Fiscal Year 2023. Additionally, 291 individuals were reported to have been employed during Fiscal Year 2023.

Top 10 Counties for Peer Support Service Provision

Peer Support – Report Narrative

The Peer Support, 15 min, referenced in this report and related data metrics, is specific to Peer Support services provided outside of bundled services such as PACT, ICORT, CSU, and Mobile Crisis. The Peer Support, 15 min, referenced above also does not include Peer Support or Peer Bridger services provided at the state psychiatric hospitals. The charts above and below depict the counties from which the highest number of Peer Support Services were provided, and the regional breakdown by whom individuals were served, respectively.

Peer Support Services by Region

Key Terms & Definitions

- **Core Services:** The set of services for adults with serious mental illness considered to be key to the prevention of unnecessary hospitalization in state psychiatric hospitals. These services are: Mobile Crisis Teams, Crisis Stabilization Units, Programs of Assertive Community Treatment, Intensive Community Outreach and Recovery Teams, Intensive Community Support Services, Permanent Supported Housing, Supported Employment, Peer Support, and Community Support Services.
- **County of Referral:** County of Referral means the county in which a referral was initiated for a given service.
- **County of Residence:** County of Residence refers to each person's county of residence based on the person's reported address in the respective CMHC's Electronic Health Record.
- **Data Warehouse:** System utilized by the Mississippi Department of Mental Health for capturing data from certified providers for federal and state reporting.
- **DMH Operational Standards:** The *Mississippi Department of Mental Health Operational Standards for Mental Health, Intellectual/Developmental Disabilities, and Substance Use Community Service Providers*, commonly referred to as the *DMH Operational Standards*, is DMH's published set of promulgated rules for agencies which are certified or are seeking certification by the Mississippi Department of Mental Health. This document is part of Administrative Code through the Mississippi Secretary of State's Office.
- **Missing Data:** Missing Data does not refer to the absence of data, but rather an element of data entered (e.g., individual served was reported but County of Residence was missing).
- **Mississippi United to End Homelessness (MUTEH) and Open Doors Homeless Coalition (ODHC):** Housing agencies which process DMH-funded CHOICE housing vouchers.
- **Out of State:** Out of State refers to a person being served in Mississippi with a reported residence outside of Mississippi.
- **Relias Learning:** An online, customized learning management system and staff development tool which is utilized by DMH for staff development, professional credentialing, and technical assistance educational activities.
- **Same Level of Care (SLOC):** Term which generally refers to an equal or comparable standard of medical treatment or service.
- **SMI Adviser:** An online resource and consultation service designed to support healthcare providers who treat individuals with serious mental illness, which was developed by the American Psychiatric Association (APA) in collaboration with the Substance Abuse and Mental Health Services Administration (SAMHSA); the platform offers evidenced-based clinical guidance, training materials, and resources to help providers deliver quality care.
- **Statewide Capacity to Serve:** The capacity of a fully staffed service team at any single point in time.
- **Web Infrastructure for Treatment Services (WITS):** System utilized by the Mississippi Department of Mental Health for capturing data from certified providers for federal and state reporting.
