

**Mississippi Department
of Mental Health
Provider Bulletin**

Number IO0170

Subject: Network of Care

Issue Date: August 25, 2025

Effective Date: Immediately

Scope

All DMH-Certified Providers and DMH-Operated Programs

Purpose

DMH has recently engaged the Network of Care, with plans to launch a Network of Care site in Mississippi in the near future. The Network of Care web-based platform is designed to provide comprehensive information and resources to individuals and families dealing with health and social services. Network of Care is recognized as a qualified SAMHSA expenditure to facilitate access to behavioral health services across the nation. The information that populates the Network of Care site is pulled from publicly-available sources, such as your web sites, Google search results, and more.

DMH Certified Providers, particularly Community Mental Health Centers, may be contacted by Network of Care staff in the near future for assistance in validating the service and program location information that will be displayed when the site launches. DMH also plans to share a link so you can review the site when a test version is available. Your assistance in reviewing this information for accuracy is greatly appreciated, as is any feedback on the test site. If you are a CMHC Director or a contact for the DMH Division of Certification, please be on watch for further correspondence regarding this project and an introduction to Network of Care contacts who would like to review some program and service information for your agency.

You may direct further questions to Adam Moore with the Department of Mental Health at adam.moore@dmh.ms.gov.
